Health Provider Portal Release Notes (Build 6.7)

The Health Provider Portal permits General Practitioners to access The Viewer.

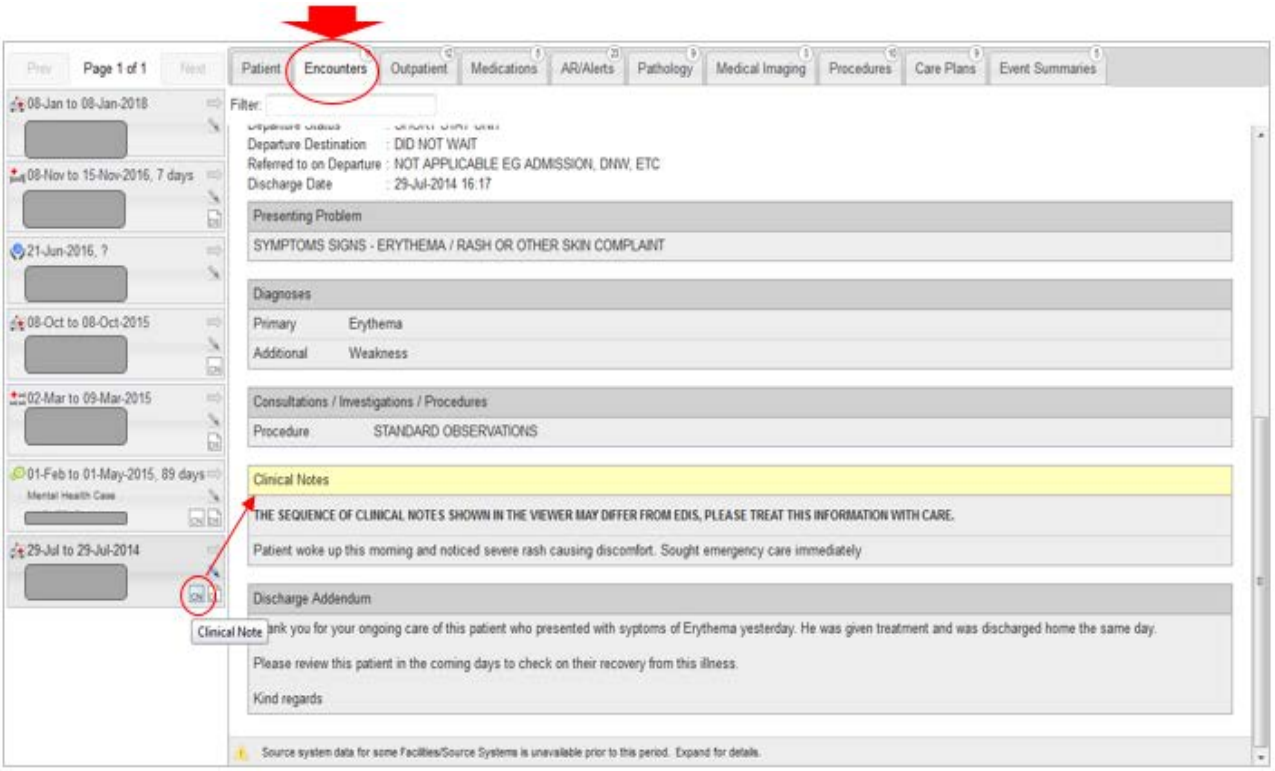
The Viewer allows General Practitioners access to summary details of patient's treatment, investigations and care at any Queensland Health facility statewide.

What's new for General Practitioners?

This update covers the following enhancement:

- New Clinical note (CN) icon

NEW - Clinical note (CN) icon

This Business Reference Group prioritised initiative provides quick and easy access to clinical notes associated with encounters, by adding a CN icon on the Quick List Encounter for all emergency encounters that are supported by notes in The Viewer (like CIMHA CN icon functionality).


Selecting the icon will take users to the 'Encounters tab', with the encounter expanded, focused on the Clinical Notes section of the page. If a Discharge Summary and/or Letter is also available the CN icon will display next to the DS icon, as per example below.
