

Instructions for Health Education Session Evaluations

- Evaluation of Health Education Sessions comprises 2 parts:
 - ⇒ Pre-session evaluation to be completed by each parent/carer & collected prior to the session commencing
 - ⇒ Post-session evaluation to be completed by each parent/carer at the end of the session and collected before the participants leave
- If more than 1 parent/carer of a child attends, then each person should complete a separate questionnaire
- Please have pens/pencils on hand for participants who do not have their own
- The suggested script for explaining the evaluation questionnaire to participants is:

'To ensure we are able to develop health education sessions that parents find useful, we request your assistance in completing this survey. This feedback will assist us in the development of future health education sessions.

Completion of this survey is voluntary and confidential. At the end of today's health education session, you will be asked to complete a post-session evaluation. To ensure confidentiality but provide us with the ability to match your pre-session survey with your post-session survey, we ask that you fill in the blank code.

*To do this - please write the first 3 letters of your **mother's maiden name** in the first 3 spaces in the box, and then write **your year of birth** in the last 4 spaces in the box. You will also need to enter this code on the Post-session evaluation.*

Thank you for taking the time to complete both surveys'.
- Following the session, please keep all responses together in an envelope which is clearly labelled with the name of the session, date and venue. Organise for the Evaluation Team to collect them for future analysis.

HEALTH EDUCATION PRE-SESSION SURVEY
