Date: 2005
Pages: various
Abstract: The demand for improved health care services for the aged has highlighted the need for health professionals, and in particular nurses, to be adequately prepared for the unique challenges associated with the care of the older person. Given the particular health needs of the aged population, nurses require the capacity to incorporate a palliative approach when caring for older persons with life-limiting conditions.

Title: Get Stronger, Live Longer.

Author: Ideas that work

Place: Ideas that Work - (03) 95251407, Commonwealth of Australia,

Date: 2006

Abstract: Strength training programs that have been designed to meet individual needs and fitness levels can result in improved balance, gait, flexibility and coordination. So the ability to walk, lift and bend will improve too. Increased strength can help prevent falls and also helps in the prevention and management of health conditions such as osteoporosis and diabetes.
