Figure RK 6.6: Proportion of Indigenous people in Rockhampton HSD, compared to Queensland by collection district, 2001

Percentage of population who are Indigenous
- Much greater (5.5 to 93.2%)
- Greater (3.1 to 5.5%)
- QLD or less (0 to 3.1%)

1. Due to the interplay between these factors and current data sources it is impossible to attribute differences to a single sociodemographic factor.
2. Order of burden of disease of conditions based on rank order of excess burden of bottom quintile of SEIFA 1996, compared with top quintile. Order and inclusion of conditions not based on burden of disease in socioeconomically disadvantaged populations.
3. Condition list based on multiple measures, but not burden of disease based on disability adjusted life years. No rank order applies.
4. Health determinants listed are those in excess prevalence in the specific sub-population and are not in rank order of impact on burden of disease.
