Figure TA 6.6: Proportion of Indigenous people in Tablelands HSD, compared to Queensland by collection district, 2001

Percentage of population who are Indigenous
- Much greater (5.5 to 61.8%)
- Greater (3.1 to 5.5%)
- QLD or less (0 to 3.1%)

Figure TA 6.7: Proportion of population in quintile of highest socioeconomic disadvantage in Tablelands, by collection district, 2001

Index of relative socioeconomic advantage/disadvantage
- Disadvantage quintile
- Not included in analysis
### Sociodemographic groups in Tablelands HSD

<table>
<thead>
<tr>
<th>Tablelands HSD total population</th>
<th>Currently in greater proportion</th>
<th>In higher proportion and increasing</th>
<th>Other population groups</th>
</tr>

#### Health determinants

| Harmful alcohol consumption Smoking Poor nutrition Overweight & obesity Physical inactivity Breast & cervical cancer screening Vaccination Social determinants | Harmful alcohol consumption Smoking Poor nutrition Overweight & obesity Physical inactivity Vaccination Breast & cervical cancer screening Harmful alcohol consumption Smoking Illicit drugs Social determinants | Poor nutrition Overweight & obesity Physical inactivity Falls Influenza vaccination Social determinants | Smoking Poor nutrition Overweight & obesity Physical inactivity Social determinants | Poor nutrition Overweight & obesity Physical inactivity Sun protection Social determinants | Harmful alcohol consumption Smoking Illicit drugs Social determinants | Harmful alcohol consumption Smoking Overweight & obesity |

---

1. Due to the interplay between these factors and current data sources it is impossible to attribute differences to a single sociodemographic factor.
2. Order of burden of disease of conditions based on rank order of excess burden of bottom quintile of SEIFA 1996, compared with top quintile. Order and inclusion of conditions not based on burden of disease in socioeconomically disadvantaged populations.
3. Condition list based on multiple measures, but not burden of disease based on disability adjusted life years. No rank order applies.
4. Health determinants listed are those in excess prevalence in the specific sub-population and are not in rank order of impact on burden of disease.
