

Important Notice for All Screening Sites (updated 10th April 08)

ATA Cable Calibration (New Notice 10th April 2008)

This message is to reinforce that all screening sites must ensure that systems are put in place to alert them when the ATA cable on the Algo Screening machine is due for calibration.

ATA cables must be calibrated every twelve months. If you need any assistance regarding this please contact your area co-ordinator.

Policy re use of Assistants-in-Nursing for Newborn Hearing Screening

Assistants-in-Nursing are not appropriately qualified to undertake Newborn Hearing Screening. The Screening must be performed by persons at least as qualified as enrolled nurses who have successfully completed the training requirements and had their competencies assessed.
