(a) "Infants" refers to new births recorded by the Neonatal Screening Laboratory. Please note this includes stillborn babies.

(b) "Cases" refers to confirmed cases notified to the Neonatal Screening Laboratory.

(c) Cases per 10,000 infants.

The above information has been provided to the Data Services Unit by the Neonatal Screening Unit for use in this publication. Neonatal Screening data has been included in response to clinician request. Differences in birth figures between these data and the Perinatal Data Collection are a result of different collection methodologies. Appreciation is extended to the Neonatal Screening Unit for their assistance. It should be noted that the Perinatal Data Collection does not capture neonatal screening data - and therefore cannot provide any further information regarding this table. Interested parties may contact the Neonatal Screening Unit in the following manner:
