4 years	Diphtheria-tetanus-pertussis-poliomyelitis ²			Measles-mumps-rubella ²				Pneumococcal		
Year 8	Hepatitis B ³ (2 doses)					Varicella (chickenpox) ³	Human Papillomavirus ³ (females only) (3 doses)			
Year 10	Diphtheria-tetanus-pertussis ^{2,3}									
15 to 49 years									Influenza Pneumococcal	
50 years & over									Influenza Pneumococcal	
65 years & over	Influenza	Pneumococcal								

Schedule Key

1 Only underlying medical conditions.

2 These are combined vaccines, meaning one injection protects against several diseases.

3 Adolescent vaccinations are offered in the *School Based Vaccination Program*. Catch-up for these vaccines is available from your doctor or immunisation provider.

4 Refer to the Queensland Tuberculosis Control Program website for more information about tuberculosis <http://www.health.qld.gov.au/qtbcc/clinicalgtreat/infectcontrolgl.asp>

NOTE: A free booster dose of pertussis vaccine for birth parents, adoptive parents and foster parents of children under 6 months of age is available from your doctor or immunisation provider. Expectant fathers can request their free vaccination prior to the birth of their baby.
