# Immunisation is important

National Immunisation Program Schedule Queensland  
October 2011

This poster shows the vaccines used in the National Immunisation Program Schedule in Queensland.

The smaller poster (A4) is for vaccines for use in children up to 4 years of age, while the larger poster (A3) covers vaccines recommended from birth to 65 years.

## National Immunisation Program Schedule Queensland October 2011

Age	Vaccine and Antigens – Childhood Schedule			Routine childhood vaccinations plus		Additional vaccines for high risk children *	Additional vaccines for Aboriginal & Torres Strait Islander children	Annual seasonal influenza for medical at risk groups *
Birth	H-B-VaxII paediatric » Hepatitis B birth dose administered within 7 days of birth			BCG® » Tuberculosis*				Annual seasonal influenza for medical at risk groups *
2, 4 & 6 months <i>Vaccines due at 2 months of age can be administered from 6 weeks</i>	Infanrix® hexa » Diphtheria-tetanus-pertussis-hepatitis B-inactivated poliovirus-Haemophilus influenzae type B (Hib) Infanrix® hexa must be reconstituted with PRP-T (Hib) supplied with the vaccine	Age limits apply	Rotateq® » Rotavirus Oral vaccine	Prevenar 13® » Infant pneumococcal				Refer to the Annual Seasonal Funded Influenza Program Schedule to check eligible groups and other relevant information.
