

## Professor Thomas Marwick

MBBS, FRACP, PhD, FESC, FACC, FRCP

*Senior Clinical Research Fellowships – Round One Recipient*

Professor Marwick is an internationally recognised leader in the cardiovascular imaging.

His previous research has led to the establishment of an accurate and cost-effective diagnosis tool for coronary artery disease. This research has since been incorporated into guidelines for diagnostic testing by the American College of Cardiology.

As a recent recipient of the Senior Clinical Research Fellowship he will be based at the Princess Alexandra Hospital and the University of Queensland, School of Medicine.

Prof Marwick's research will include improvements in the contribution of cardiovascular imaging to clinical decision making, including the application of telehealth to the delivery of appropriate testing in rural areas.
