(a) "Bed equivalence" portrays the activity in terms of the number of public hospital beds that would otherwise be required to provide these services.

(b) Includes available bed alternatives (but not cots for normal neonates).

(c) Available bed figures are as at the last Wednesday of the month of June.

(d) Community-based services refers to those public hospital admitted patient services provided off-site, e.g. Hospital in the Home.

(e) Total bed capacity is the sum of public hospital available beds and the bed equivalence of other Queensland Health funded admitted patient services.

(f) Excludes unqualified newborns, posthumous organ procurement, and boarders.

(g) The data source for pathology occasions of service changed from 1 July 2000 and resulted in a larger number of services being reported.

(h) Includes Dental Hospitals and dental occasions of service up to and including financial year 2007/2008. From 2008/2009 Dental are no longer reported.

p. preliminary, subject to change.
