

## List of Pathological, Clinical and Provisional Diagnosis Notifiable Conditions - Public Health Regulation 2005 – as at 30 October 2009

- Acquired immunodeficiency syndrome (AIDS) # (C)
- Acute flaccid paralysis ☎ (C)
- Acute rheumatic fever (C)
- Acute viral hepatitis (P)
- Adverse event following immunisation (C)
- Anthrax ☎
- Arbovirus (mosquito borne) infections, the following types—
  - Alphavirus infections including:
    - Barmah Forest
    - Getah
    - Ross River
    - Sindbis
  - Bunyavirus infections including:
    - Gan Gan
    - Mapputta P
    - Termeil
    - Trubanaman
  - Flavivirus infections including: ☎
    - Alfuy
    - Edge Hill
    - Kokobera
    - Kunjin
    - Stratford
  - Any other arbovirus infections (NB: dengue, yellow fever, Japanese encephalitis and Murray Valley encephalitis are listed separately)
- Australian bat lyssavirus infection ☎
- Australian bat lyssavirus, potential exposure ☎ (C)
- Avian influenza ☎ (P)
- Botulism ☎
- Brucellosis
- Campylobacteriosis
- Chancroid
- Chikungunya
- *Chlamydia trachomatis* infection
- Cholera ☎
- Ciguatera poisoning ☎ (C)
- Creutzfeldt-Jakob disease (P)
- Cryptosporidiosis
- Dengue ☎ (P)
- Diphtheria ☎ (P)
- Donovanosis
- Food or water-borne illness in 2 or more cases ☎ (C)
- Food or water-borne illness in food handler ☎ (C)
- Gonococcal infection
- Haemolytic uraemic syndrome (HUS) ☎ (C)
- *Haemophilus influenzae* type b (invasive) disease ☎ (P)
- Hendra virus infection ☎
- Hepatitis A ☎
- Hepatitis B
- Hepatitis C
- Hepatitis D
- Hepatitis E
- Hepatitis (other)
- HIV (human immunodeficiency virus) infection #
- Influenza
- Invasive Group A streptococcal infection
- Japanese encephalitis ☎
- Lead exposure (notifiable) (blood lead level of 10 ug/dL (0.48 µmol/L) or more)
- Legionellosis ☎
- Leprosy (Hansen's disease)
- Leptospirosis
- Listeriosis
- Lyssavirus infection (unspecified) ☎
- Malaria
- Measles ☎ (P)
- Melioidosis
- Meningococcal disease (invasive) ☎ (P)
- Mumps
- Murray Valley encephalitis ☎
- Non-tuberculous mycobacterial disease
- Paratyphoid ☎
- Pertussis (C)
- Plague ☎
- Pneumococcal disease (invasive)
- Poliomyelitis ☎
- Psittacosis (ornithosis)
- Q fever
- Rabies ☎
- Rotavirus infection
- Rubella, including congenital rubella
- Salmonellosis
- Severe acute respiratory syndrome (SARS) ☎ (P)
- Shiga toxin and vero toxin producing *E.coli* infection VTEC/SLTEC
- Shigellosis
- Smallpox ☎ (P)
- Syphilis, including congenital syphilis
- Tetanus (C)
- Tuberculosis (P)
- Tularaemia ☎
- Typhoid ☎
- Varicella - zoster virus infection (chickenpox, shingles or unspecified)
- Viral haemorrhagic fevers (Crimean-Congo, Ebola, Lassa fever and Marburg viruses) ☎ (P)
- Yellow fever ☎
- Yersiniosis

# To be notified to the AIDS Medical Unit.

(C) Requires notification on clinical diagnosis

(P) Requires notification by clinicians on clinical/provisional grounds while awaiting laboratory confirmation

☎ Requires immediately notification by phone or fax to the local public health unit
