

*Queensland Health reports activity in the public health system as summarised acute public hospital data as well as in outputs specified in the Ministerial Portfolio Statements 2002-03.*

The acute public activity data provides a historical record of the services provided by the State's public hospitals, including public services provided by the Mater public hospitals.

The budget outputs provide for reporting of performance under the Government's *Managing for Outcomes Framework* and cover:

- treatment and management – acute inpatient services
- treatment and management – non-inpatient services
- integrated mental health services
- health maintenance services
- public health services
