

Clinical Management Expert Advisory Group

CLINICAL ADVICE UPDATE

Recommended Medications for Flu Clinics

The Clinical Management Expert Advisory Group provides recommendation for the following **medications** for Flu Clinics:

1. Drugs other than the antivirals
 - Paracetamol
 - Amoxicillin
 - Roxithromycin
 - Ceftriaxone
 - Salbutamol inhalers with disposable / non-reusable spacers
 - Paracetamol with codeine, and laxatives

2. Other emergency drugs
 - Adrenaline 1 in 1000 and 1 in 10000
 - Antihistamines
 - Hydrocortisone
 - Normal Saline (10ml ampoules and 1L bags)

This is a minimum set of medications that should be available at Flu Clinics. The use/prescription/dispensing of these medications should be considered within the scope of practice of the health care providers available on site.
