Queensland Ambulance Service

Significant Incident Review

Gold Coast Region

Authority:

By authority of Andrew Hebbron, Assistant Commissioner Gold Coast Region (GCR).

Executive Summary:

At 12.43am Sunday, 23 July 2023, the Queensland Ambulance Service (QAS) received a first party caller request for service for a Irrelevant female patient who stated to be suicidal and advised she was actively cutting herself. QAS incident number **17810642.** The caller was not clear on the call and could not provide an accurate address for this incident.

The initial response was coded 2A – 25B03 (Threatening Suicide). The Emergency Medical Dispatcher (EMD) transferred the call to the Mental Health Consult Line (MHCL), for further specialist referral. The Mental Health Nurse requested for the incident to be upgraded and the case was prioritised as a 1C.

At the time of the call the Southport Operations Centre (OpCen) was experiencing extreme workload with 48 cases pending across the three dispatch regions. The first unit assigned to the case was at 2.58am which arrived and staged waiting for police from 3.18am. This unit was diverted to another incident at 4.21am without making patient contact. Another unit was assigned to the incident at 5.01am once the police service had an available unit and arrived at 5.20am. The crew and police arrived at the residence provided, which was not the correct location.

The Queensland Police Service had details of a similar patient at an address nearby and attended that scene with the paramedics. On arrival they identified a female patient, hanging and she was declared deceased at 5.51am.

Terms of Reference:

This review will investigate all aspects of ambulance response to incident **17810642**. The review will examine ambulance operations prior to, during and following the response. This review will include all requirements outlined in the *Operational Incident Review Process*.

Region Clinical Incident Summary Report:

The GCR Clinical Education Unit conducted review noted no clinical concerns with this incident noting upon arrival the patient was obviously deceased and nil interventions were made.

Operations Centre:

State ProQA conducted and no issues identified operations centre management of the incident was appropriate.

The Brisbane Operations Centre Supervisor (OCS) reviewed the calls and noted:

"...PT WAS PROVIDED Irrelevant EMD TRIED TO CONFIRM THE ADDRESS MULTIPLE TIMES AND EVEN ASKED FOR PT TO TRY AND FIND SOME MAIL TO CONFIRM. PT SOUNDED VERY CONFUSED AND UNDER THE INFLUENCE. WHEN EMD WAS UNABLE TO TRANSFER CALL TO MHLC SHE AGAIN TRIED TO GET THE PT TO FIND SOME MAIL TO CONFIRM THE EXACT ADDRESS. PT KEPT REPEATING SINGLE WORDS OVER AND OVER AGAIN."

Effective From: 7 August 2020 SC Classified as SENSITIVE

Queensland Ambulance Service: Operational Incident Reporting

QAS Mental Health Liaison Service Component

The Mental Health Liaison Service (MHLS) calls were reviewed by Irrelevant rom the QAS Mental Health Response Program.

The MHLS Clinician took the warm transfer for the first party caller in this instance. During the call the MHLS Clinician struggled to gain demographic and clinical information. Without a name and a date of birth, the MHLS Clinician was unable to look up history of the patient from the Queensland Health Mental Health data base (CIMHA) or the Viewer.

During the call the MHLS Clinician was able to ascertain that the caller was in significant distress, expressing suicidal ideation, was acutely intoxicated with substances and was engaging in deliberate self harm / acts which were risky in nature (i.e. cutting herself with a razor). The MHLS Clinician attempted to safety plan with the caller – to put the razors down or to get support from others. The patient refused to put the razors down and did not have anyone available to support her.

The MHLS clinician assessed this situation as a very high-risk scene, which required an urgent response and so recommended an upgrade of the job from a 2A to a code 1 response.

The only protective factor which was present in this scene was that the person had called Triple Zero (000) for help – help seeking is a protective factor for people in a mental health emergency. Noting that the crew had been instructed to stage for police from the start of the call, the clinician attempted to make the scene as safe as possible for the attending crews, given the current presentation of the patient. The MHLS Clinician identified this and discussed scene safety with the patient to gain an assurance that the patient would not be violent or aggressive to the QAS if they attended.

The MHLS Clinician would have been unaware of the impact that the current operational work load would have on response times and may have assumed that upgrading the job would have meant a more timely attendance from a crew.

Incident Review/:

Background:

A first party caller advising of suicidal intention called QAS requesting service, advising she was actively cutting herself with razor blades. The caller was hard to understand, believed to be significantly impaired by alcohol. The caller had difficulty providing her phone number and street location, {*Recording 1. CALL 230723_000Call Audio_INC 17810642_Coomera*}.

The case was upgraded from a road speed to a lights and sirens response following review from the MHLS Clinician who spoke to the caller and documented the caller advised she would not be violent or aggressive toward paramedics. The Mental Health Clinician in the MHLS was unable to gain accurate information, and encourage the patient to divert her attention away from self-harm {*Recording 2. CALL 00.48.55 MHLC to 23 July 2023*}.

The Southeast Queensland Regions of the QAS were experiencing extreme hospital delays – impacting operational service delivery during the period of this incident. Just after the case entered the pending cue, the Southport Operations Centre (OpCen) Gold Coast Dispatcher placed a common call for available units, with 9 code 1 incidents pending in the Gold Coast Region {*Recording 3. 230723_Common Call_Inc 17810642_Coomera*}.

The first unit was dispatched 2 hours 15 minutes after the initial call and staged awaiting QPS for an hour before being diverted to another incident. The dispatcher acknowledged the dispatch location and advised QPS had been requested {*Recording 6. 230723_Dispatcher confirms case details_02.59.39_inc17810642 Coomera*}

The second unit was dispatched 4 hours 20 minutes after the initial call once QPS were responding. On their arrival it was identified the address was incorrect {*Recording 15. 230723_601527 Gained access stand down*

Timeline:

Saturday 22 July 2023

20:57:00	SEQ Escalated to Extreme hospital delays by State Operations Coordination Centre (SOCC)							
Sunday 23 July	Sunday 23 July 2023							
00:43:34	Call received for a Irrelevant _{female} , suicidal, actively self harming – 2A – 25B03 – Threatening Suicide – nil units available for dispatch							
00:51:40	upgraded to a code 1C – 25B03W – Threat Suicide Weapon following review and recommendation of the MHLS Clinician – nil units available for dispatch							
01:04:06	Southport Operations Centre (OpCen) Emergency Medical Dispatcher (EMD) placed a COMMON CALL for a unit to respond – nil units available for dispatch.							
02:01:57	MHLS Clinician attempted a call back – nil answer							
02:58:26	Acute Advanced Care Paramedic (ACP) unit B601508 assigned to incident from Gold Coast University Hospital (GCUH)							
03:18:49	B601508 staged – nil QPS unit available at this time and nil information available							
04:21:28	B601508 was diverted to another active incident and the case was returned to the pending cue							
05:01:37`	Acute ACP unit B601527 was assigned to the incident from GCUH and arrived at a staging location at 5.20							
05:24:51	B601527 and QPS arrived at the incident address provided and were initially unable to gat anyones attention or access – QFES were requested to assist.							
05:40:29	B601527 SITREP – MADE CONTACT WITH PERSON ON SCENE WHICH IS NOT PT - QPS HAVE PT AT {nearby address]							
5:46:42	arrived at the alternate address and requested CCP backup for a person hanging at this location.							
05:51:00	B601527 declared the patient deceased.							

Further Operational Information:

The incident was a first party caller who was unable to provide specific scene detail, she was able to provide part of her phone number – the parts provided matched the CLI. She provided part of her address, The unit and the street name were correct, the street number was not.

The pronunciation of the patients last name, by the caller, was slightly misinterpreted, so this, and the incorrect address meant patient could not be matched to existing QAS incident, MHLS clinical data base or QPS flag date.

Queensland Ambulance Service: Operational Incident Reporting

A query was raised regarding the speed by which the attending crews were travelling to the incident. While none of the staff could specifically recall a reason why their road speed may have registered below the speed limit, there are frequently roadworks, challenging curves in the road and consideration of other drivers that may impact road speeds. It is not anticipated that the speeds involved in this case were untoward or otherwise contributed to any outcomes in this incident.

As part of this review, it was noted that a supervisor should have been notified by the OpCen at the time of the initial staging, in keeping with the Notifications to Senior Officer's standard operating procedure. In this case that has not occurred. Southport OCM has since issued two reminders to OpCen staff to ensure supervisor notifications occur when crews are staging. It is unclear whether a supervisor notification in this case would have changed the outcome noting the attending staff were firm in their view that was a potentially dangerous scene. The first unit that staged was on scene at 03:18hrs – it is noted that call-backs at 02:01hrs went unanswered. Without knowing the exact time of death, it is unable to be determined whether this decision has influenced the outcome.

Summary:

Review Recommendations:

- Follow up welfare for all officers attending this incident Complete
- Follow up with family of deceased- complete, meeting occurred on the 25/07/2023.
- Reminder to OpCen staff re SOS/OS notification regarding staged crews Completed on 17 August 2023

Outcomes:

- The attending staff believed that staging was the correct approach noting the patient was known to be carrying weapons – they have expressed distress and sorrow at the outcome. It is clear there was a genuine concern on their part for the safety which directly influenced their decisions to stage.
- Gold Coast Region Assistant Commissioner and the Southport Operations Centre manager met with family and friends of the deceased, to discuss the incident and explain QAS actions at the time of and during the incident. The family indicated that they were satisfied with and grateful for the meeting.
- The OpCen have reminded staff of the importance of Notifications to Senior Officer's Standard Operating Procedure.
- The reviewer notes the unpredictable nature of the environments and situations that QAS staff are exposed to which makes decisions to stage extremely difficult, particularly where weapons are involved. The decision to stage in this case was a difficult one to make by the attending staff.

Post OIRR actions:
