Connecting clinicians to improve care

The Digital Transformation of Health

Thursday, 4 August 2016

Brisbane Convention and Exhibition Centre

Pre-meeting seminar

Sky Room 1, Sky Level

2-5pm

A Digital Hospital Master Class: Lessons learned from implementing the digital hospital in Queensland

There is no doubt that digital healthcare is our future... but digital disruption in a hospital is hard to manage.

Digital hospitals don't just involve the implementation of technology and equipment but provide an opportunity to transform how healthcare is delivered.

This 3 hour seminar will focus on clinical implementation and leadership and give delegates an opportunity to share in the experiences of Queensland hospitals that have made the leap. Issues, opportunities and pitfalls will also be explored.

Presenters from: Saint Stephen's Hervey Bay – Australia's first fully-integrated digital hospital; Princess Alexandra Hospital – Australia's first public digital hospital; Cairns Hospital - the first Australian hospital to use Maternity digital records and first Queensland Hospital to use paediatric and community digital records; and Mackay Hospital who are about to make the leap!

Target audience: clinicians and health system leaders interested in driving digital innovation.
