

## Network training hospitals

Training will be hosted primarily at the Queensland Children's Hospital, the Townsville University Hospital and the Gold Coast University Hospital. Extensive use will also be made of other accredited hospitals for specific components of the core training, including general paediatric terms at both outer metropolitan and regional hospitals.

The following Queensland hospitals are accredited for components of advanced training in general paediatrics and may participate in the Queensland General Paediatric Advanced Training Network.

Further information relating to each individual site including contact details for general paediatric advanced training enquiries is available in the department descriptions outlined below.

## Caboolture Hospital

<b>Hospital information and highlights</b>	<p>Caboolture Hospital serves a population of around 155,000. We are between Brisbane and the Sunshine Coast, located in an area of rapid growth. Caboolture Hospital has a busy Paediatric service as it deals with a growing community with highly variable social demographics. We have more than 12,500 paediatric presentations in emergency department per year and over 3000 admissions to the ward and paediatric short stay unit. This provides great learning opportunity to trainees in the field of general paediatrics assisted by supportive senior staff, education, and quality improvement activities in the department.</p>
<b>Service type</b> (inpatient/outpatient/community)	<p>Inpatient and Paediatric Short Stay services</p> <p>General Paediatric clinics</p> <p>Child Protection Clinic, Diabetic and Endocrine clinics, Paediatric Respiratory clinics.</p>
<b>No. of beds</b> <b>Annual paediatric admissions</b>	<p>12 General Paediatric beds and 5 Paediatric Short Stay beds, 12 Special Care cots</p> <p>The Paediatric Unit cares for around 4,000 children and infants each year under the age of 16</p> <p>Special Care Nursery admissions around 375 babies per year</p>
<b>No of births</b> (if applicable)	<p>2,000 births. Infants above 32 weeks of gestation are cared for in our SCN. We offer CPAP and commence ventilation/surfactant if required.</p>
<b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status	<p>Maximum of 12 months of core training</p> <p>Accredited to 2018 for basic and 2022 for advanced training</p>
<b>Potential rotations</b>	<p>General Paediatrics</p> <p>Special Care Nursery</p> <p>Outpatient Clinics</p>
<b>Staffing and supervision</b>	<p>Director of Paediatrics</p> <p>8 Paediatricians comprising 6 FTE including Director</p> <p>Sub-specialists in Paediatric Endocrine and Respiratory medicine</p> <p>9 registrars or PHOs</p> <p>2 x RMO (JHO and intern)</p> <p>No. of Advanced Trainees: 1</p>

<b>Teaching and learning</b>	<p>Weekly paediatric grand rounds</p> <p>Daily Consultant rounds</p> <p>Weekly structured teaching for Registrars and PHOs</p> <p>Advanced Neonatal Resuscitation programme and Neonatal Stabilisation courses</p> <p>Monthly Morbidity and Mortality meetings</p> <p>Protected time for quality improvement including Audits/ research</p>	
<b>Profile of work</b>	<p>Coverage roster – rotating roster</p> <p>Ward responsibilities</p> <p>Outpatient Clinics and attendance in child protection meetings</p> <p>Specialist clinic coverage – General Paediatrics, Endocrine Clinic, Respiratory Clinic</p> <p>Research/presentations – Opportunity to participate in hospital grand rounds</p> <p>Teaching responsibilities - Weekly RMO teaching</p>	
<b>Hospital web link</b>	<p><a href="https://metronorth.health.qld.gov.au/caboolture/">https://metronorth.health.qld.gov.au/caboolture/</a></p>	
<b>Hospital contact</b>	<p>Name:</p> <p>Tel:</p> <p>Email:</p>	<p>Dr Salil Gandhi</p> <p>(07) 5433 8090</p> <p><a href="mailto:Salil.Gandhi@health.qld.gov.au">Salil.Gandhi@health.qld.gov.au</a></p>

## Cairns Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Cairns and Hinterland Hospital and Health Service has the responsibility of providing public hospital and health services to a population of approximately 280,000 people. The primary catchment of the CHHHS covers an area of 142,900 km<sup>2</sup> from Tully in the south, Cow Bay in the north and Croydon in the west. The outer western region of our Service encompasses extremely remote communities. The paediatric department also supports the provision of care to children in the Torres and Cape HHS to the North as well as a number from PNG.</p> <p>Close to 91% of our paediatric work is managed locally and there is excellent support from our local adult ICU for severely unwell children who are then managed in conjunction with/transferred to our regional Paediatric ICU in Townsville Hospital.</p> <p>We manage a very wide range of conditions including all those commonly seen in all metropolitan areas but also a significant number of tropical diseases along with problems related to socio-economic disadvantage. Considering our population's demographics and as the primary referral centre for TC HHS to the North of us, a substantial proportion of our work is with children and families who identify as Aboriginal and/or Torres Strait Islander - as such we are very focused on culturally appropriate indigenous healthcare.</p> <p>We provide local sub-specialist services in paediatric cardiology, endocrinology and diabetes, paediatric allergy and rheumatology along with paediatric oncology services for the region in partnership with the Queensland Paediatric Haematology Oncology Network.</p> <p>We have strong established links with the Queensland Children's Hospital in Brisbane and host visiting sub-specialist clinics from respiratory/CF and sleep medicine, genetics, haematology, oncology and metabolic medicine along with a paediatric surgical outpatient service from Townsville Hospital.</p> <p>The unit is committed to providing consistent and high-quality supervision to all our trainees, ensuring professional development along with utilisation of learning opportunities and consultant support.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services Outreach programmes and Community Development Services Paediatric endocrinology, cardiology, allergy subspecialist clinics Level 5 SCN</p>
<p><b>No. of beds</b></p> <p><b>Annual paediatric admissions</b></p>	<p>16 bed paediatric ward (flexing to 22 beds) with a separate 8 bed adolescent unit</p> <p>22 funded SCN cot spaces</p> <p>In 2015-16 there were over 6,800 separations with the majority of work being acute (~70%).</p>
<p><b>No of births</b> (if applicable)</p>	<p>Approximately 3,000 per annum</p>

<p><b>RACP accreditation</b></p> <p>Please refer to the RACP website for up to date accreditation status</p>	<p>Maximum of 12 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General Paediatrics (Rural) – with a perinatal component</li> <li>○ For 12 months training the options are: <ul style="list-style-type: none"> <li>● 12 months GP</li> <li>● 6 months GP and 6 months CD</li> <li>● 6 months GP and 6 months AC</li> </ul> </li> <li>○ For 6 months training <ul style="list-style-type: none"> <li>● 6 months of GP only</li> </ul> </li> </ul> <p>Accredited to 2021</p>	
<p><b>Potential rotations</b></p> <p>(depending on availability)</p>	<p>General Paediatrics</p> <p><i>Not all these positions are fixed for advanced trainees in general paediatrics but can be organised by prior arrangement. ## Gladstone Hospital

<b>Hospital information and highlights</b>	<p>Gladstone is the gateway to the southern Great Barrier Reef, just a few hours' drive or an hour's flight from Brisbane. Gladstone Hospital is a part of the wider Central Queensland Hospital and Health Service District (CQHHS) servicing a population of approximately 65,000 across Gladstone and Banana Districts. Gladstone Hospital sees approximately 30,000 presentations to the Emergency Department with a paediatric casemix of approximately 25%. Category 3 and 4 patients represent 80% of paediatric presentations at Gladstone Emergency Department. Approximately, 1500-2,000 paediatric patients were admitted to the Gladstone Hospital in 2017.</p> <p>The Hospital provides a generalist model of service with trainees managing complex cases in general paediatrics and almost all paediatric subspecialties within the paediatric unit given the geographic distance from the only tertiary children's hospital, the Queensland Children's Hospital (QCH) in Brisbane.</p>
<b>Service type</b> (inpatient/outpatient/community)	<p>Inpatient and outpatient services</p> <p>General Paediatric with acute neonatal component</p> <p>Community and child behavioural services</p> <p>High dependency inpatient services</p> <p>Emergency paediatric with immediate resuscitation services</p> <p>The service is supported by increasing collaboration with Paediatric sub-specialties at QCH</p> <p>The Unit also provides support for Telehealth appointments between patients and Specialists from QCH which is primarily the responsibility of the JHO/SHO. The Telehealth appointments are arranged for after the ward round from 11am.</p> <p>There are planned/elective admissions to the ward for chronic patients or patients requiring investigation, observation or management. There are planned ward reviews that also will present to the ward and require review usually of recently discharged patients.</p>
<b>No. of beds</b>	<p>9 beds in the paediatric ward (excluding outliers in HDU) including one isolation room.</p> <p>Note: There is no Special Care Nursery currently, though one is under development and will potentially hold 4 neonates. Currently, we have the ability to stabilise an unwell neonate prior to transfer. Currently the JHO/SHO and Registrars/PHOs are responsible for all neonatal discharge checks.</p>
<b>Annual paediatric admissions</b>	<p>Approximately 1,500-2,000 patients per year.</p>
<b>No of births</b> (if applicable)	<p>There are between 550-600 births per year</p>

<p><b>RACP accreditation</b></p> <p>Please refer to the RACP website for up to date accreditation status</p>	<p>Maximum of 6 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General Paediatrics (Rural) – Without a perinatal component for 6 months training</li> </ul> <p>Accredited to 2021</p> <p>The Department is also affiliated with the University of Queensland Rural Clinical School for medical student teaching.</p>
<p><b>Potential rotations</b> (depending on availability)</p>	<p>N/A</p>
<p><b>Staffing and supervision</b></p>	<p>Unit Director of Paediatrics</p> <p>Paediatrician Consultants x 3 FTE</p> <p>PHO x 3 FTE</p> <p>RMO x 1 FTE</p> <p>Senior Staff have special interests in diabetes, allergy, behavioural.</p> <p>No. of Advanced Trainees: 1</p>
<p><b>Teaching and learning</b></p>	<p>The Paediatrics team at Gladstone Hospital provide a well supported educational and learning environment through a team of highly skilled and experienced staff specialists. There are a number of structured education opportunities already in place such as daily handover teachings with case presentations at 08.00. In addition to this, formal education sessions include: Unit Education every Wednesday 14.00-15.00 (i.e Case Discussion/Journal Club/M&amp;M Meetings); Case discussion of Registrar clinic cases Tuesday, Thursday +/- Friday morning 08.30 – 09.00; Rockhampton Paediatric Department Teaching: Friday 07.45-09.00; Gladstone Hospital Grand Rounds Program (Accredited with ACEM and ACRRM): Wednesday 12.00 – 13.00; Monthly Allied health Multidisciplinary Meeting Wednesday 13.00 – 14.30; Three monthly Paediatric and Obstetric Meeting Friday 13.00 – 14.00.</p> <p>Bedside teaching with the consultant during daily rounds presents another education opportunity at Gladstone Hospital.</p> <p>Due to Gladstone’s regional locality in Queensland, a number of sessions are available to staff via Videoconference. Gladstone proactively links into sessions delivered through the Weekly RBWH (Medical Grand Rounds, Department of Emergency), weekly QCH (Grand Rounds, Community Child Health, RMO Teaching), Monthly CQHHS Patient Safety and Quality and weekly Rockhampton Formal Education program.</p> <p>Regular scheduled multidisciplinary meetings are scheduled between O&amp;G, allied Health, Community Health, Surgical, Nursing staff.</p> <p>4 Hours of Protected teaching time for college projects or quality improvement activities.</p>

	<p>Professional Development Courses on offer at Gladstone Hospital:</p> <ul style="list-style-type: none"> <li>○ Advanced Life Support</li> <li>○ Paediatric Advanced Life Support</li> <li>○ Neonatal Resuscitation (first response and advanced)</li> <li>○ Practical Obstetric Multiprofessional Training (PROMPT)</li> <li>○ Cultural Practice Program</li> <li>○ Aggressive Behaviour Management</li> <li>○ Communication and Patient Safety</li> <li>○ Breastfeeding Education</li> <li>○ Foetal Surveillance Education Program</li> </ul>						
<b>Profile of work</b>	<p>Coverage Roster – weekend unit cover 1 in 3.</p> <p>Ward responsibilities/workload:</p> <ul style="list-style-type: none"> <li>○ Ward rounds – Acute Admissions</li> <li>○ Ward rounds – Obstetric (baby checks and neonatal problems)</li> </ul> <p>Specialist clinic coverage – Trainees undertake a minimum of 2 outpatient clinics per week, with support through telehealth and supervision from staff specialist.</p> <p>Research presentations – Trainees have access to mostly audit opportunities; however, the Gladstone Paediatrics unit is planning to contribute to Australia wide research.</p> <p>Teaching Responsibilities – Trainees will be responsible for UQ Yr3 MBBS medical students and Resident Medical officers who regularly rotate through the Paediatric Unit on the ward and in outpatient clinics. Trainees also contribute to the Gladstone Hospital Grand Rounds programme delivered weekly through attendance, as well as delivery of sessions, support by staff specialists of the Paediatrics team. Weekly combined presentations with Rockhampton Hospital also represent an opportunity for trainees to actively present cases and hold peer discussions.</p> <p>Trainees attend and participate in daily in-depth morning handover meetings with the paediatrics team as well as the weekly unit meeting and departmental teachings.</p>

## Mount Isa Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Mount Isa Hospital (MIH) provides a robust paediatric service which is unique because of its remoteness. The hospital provides generalist paediatric services with visiting paediatric sub-specialities of paediatric cardiology, respiratory medicine, paediatric orthopaedics, paediatric rehabilitation and telehealth clinic services in paediatric endocrinology and surgery.</p> <p>The Townsville Hospital (TTH) is a major receiving hospital and medical consultation is available 24 hours a day in areas of paediatric intensive care and neonatal medicine. Support is also provided as necessary through various services at Queensland Children’s Hospital (QCH) in Brisbane.</p> <p>The population served by the NWHHS (MIH) is approximately 23,000 with 15.1% identifying as indigenous. The population median age is 31 years, with children under 14 years representing 22.9% of the population. A significant proportion of the paediatric workload involves care of indigenous children.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services</p> <p>Outreach programs</p> <p>General Paediatric clinics</p> <p>Level 3 (currently upgrading to level 4) neonatal service supporting a Level 4 Maternity Service with slightly less than 500 deliveries per year.</p> <p>Telehealth Services with tertiary services as well as with isolated communities.</p> <p>Currently in negotiation re the appointment of a Community Paediatrician conjointly between NWHHS and Gidgee Healing (an indigenous primary health care provider)</p>
<p><b>No. of beds</b></p> <p><b>Annual paediatric admissions</b></p>	<p>10 General Paediatric beds (4 high dependency)</p> <p>400+</p> <p>Additional neonatal beds</p>
<p><b>No of births</b> (if applicable)</p>	<p>450-500</p>

## Redcliffe Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Redcliffe Hospital Paediatric Unit is a busy service, managing approximately 2,500 separations per year with an average length of patient stay of approximately 1 day. The Paediatric Unit is made up of multiple outpatient clinics, a children’s ward and a special care nursery (SCN).</p> <p>Moderately sick neonates are cared for in the SCN, a level 4 nursery equipped with 10 cots and facilities to undertake continuous positive airway pressure for infants greater than 1,500 grams and/or 32 weeks gestation as well as short term assisted ventilation for infants prior to their transfer. Neonates requiring intensive care are stabilised in the SCN prior to transfer to the Royal Brisbane and Women’s Hospital (RBWH).</p> <p>The children’s ward at Redcliffe Hospital is funded for 10–14 beds (with 16 beds physically present). Medical and surgical patients are admitted to the children’s ward. Selected orthopaedic cases are currently managed at Redcliffe hospital.</p> <p>The Paediatric Unit sees a broad mix of inpatient and outpatient general paediatric conditions. Most paediatric admissions are for the management of acute illness and hospital stay is very short, usually less than 2 days. Inpatients are predominantly of preschool age, with the most common diagnoses being bronchiolitis, chest infection (including pneumonia), urinary tract infection, gastroenteritis and other viral infections. Serious bacterial infections such as meningitis may also be managed. Young children with feeding and growth problems are often admitted. Endocrine conditions including diabetes mellitus as well as neurological conditions such as epilepsy and developmental delay are seen less frequently.</p>
<p><b>Service type</b></p>	<p>Inpatient, outpatient and community</p>
<p><b>No. of beds</b> <b>Annual paediatric admissions</b></p>	<p>10–16 paediatric beds and 10 neonatal beds 2,291</p>
<p><b>No of births</b> (if applicable)</p>	<p>Approximately 1,700 per annum</p>
<p><b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status</p>	<p>Maximum of 12 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General paediatrics with perinatal component</li> </ul> <p>Accredited to 2022</p>
<p><b>Potential rotations</b> (depending on availability)</p>	<p>General Paediatrics</p> <p><i>Not all these positions are fixed for advanced trainees in general paediatrics but can be organised by prior arrangement. ## Redland Hospital

<b>Hospital</b>	Redland Hospital, Cleveland, Qld and Wynnum-Manly Community Health Centre, Gundu Pa, Qld
<b>Hospital information and highlights</b>	<p>Redland Hospital is a non-tertiary district hospital located in the Bayside suburb of Cleveland in outer Metropolitan Brisbane. It services a population of over 150,000 people. The Paediatric Department at Redland Hospital looks after a divergent community with a wide range of patients. Our services include a Paediatric Emergency Department seeing nearly 14,000 paediatric patients annually, inpatient children's ward with short stay unit, a level 4 Special care Nursery, busy birth service and outpatients. We also care for children and families resident on the Islands of the Moreton Bay being North Stradbroke, Macleay, Russell, Lamb and Coochiemudlo which are classified as remote and rural. The Islands have a large aboriginal and Torres strait islander community, a significant proportion of the community is at risk with lower socioeconomic status with child development needs. We are involved in the holistic management of children with acute and chronic neonatal and paediatric conditions. Clients may access the service from birth to the completion of high school. Redland hospital does not have any paediatric subspecialists, we co-ordinate care of complex subspecialist cases with tertiary children's hospital Queensland Children's Hospital (QCH) which is located in Brisbane, 31km from Redland hospital.</p> <p>Wynnum-Manly Community Health Centre, Gundu Pa is the new state-of-the-art outreach public health facility located 15km from Redland Hospital. A range of services are available under one roof, including a 24-hour Primary Care Centre, Addiction and Mental Health, Allied Health, Child Development, Chronic Disease, Oral Health and Specialist Outpatients. The 24-hour Primary Care Centre us a walk-in service and designed to treat less urgent/minor injuries and illnesses.</p> <p>We also provide acute care services to newborn babies born at the Redland Mater Private Hospital which is located on the campus.</p>
<b>Service type</b> (inpatient/outpatient/community)	<p>Inpatient and outpatient services</p> <p>Paediatric emergency services</p> <p>Outreach community health clinics</p> <p>General Paediatric Clinics, Neonatal follow-up clinics, Growth and Developmental Clinics</p> <p>Level 4 Neonatal Service</p>
<b>No. of beds</b> <b>Annual paediatric admissions</b>	<p>General Paediatric Beds: capacity 11, including 2 short stay beds</p> <p>SCN Beds: 6</p> <p>Annual Paediatric Admissions: 1,700</p>
<b>No of births</b> (if applicable)	<p>Redland Hospital: approximately 2,000 births</p> <p>Mater Private Hospital Redland: approximately 340 births</p>

<p><b>RACP accreditation</b></p> <p>Please refer to the RACP website for up to date accreditation status</p>	<p>Maximum of 12 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General Paediatrics with a perinatal component</li> </ul> <p>Accredited to 2021</p>

<b>Profile of work</b>	<p>The Paediatric training program at Redland Hospital is accredited by the RACP in General Paediatrics for both basic and advanced training.</p> <p>It is also accredited by RACGP for Queensland Rural Specialist and Generalist Pathway in Paediatrics.</p> <p>It is also recognised by University of Queensland School of Medicine for Undergraduate Medical student's rotation in paediatrics.</p> <p>Our Paediatric Department has 3 advanced trainees and 3 basic trainees in general paediatrics; in addition, we have 3 Principal House Officers and 1 Intern.</p> <p>The Lamb Ward is the Paediatric ward at Redland Hospital. It currently has total of 12 beds with 2 Short Stay unit beds. There is a Level 4 CSCF Special Care Nursery that is funded for 6 beds. There is a separate 4 bed children's assessment area in our Emergency Department. Nearly 14,000 children are seen in our Emergency department; more than 2,000 babies are born in our hospital and nearly 3,000 patients are seen in our outpatient clinics every year. We have an excellent academic teaching program and are active in basic research, our research papers have been presented at the national and international conferences.</p>

# Rockhampton Hospital

<p><b>Hospital information and highlights</b></p>	<p>Rockhampton Hospital paediatric service is the referral centre for Central Queensland Hospital and Health Service. The CQHHS serves a population of 230,000 people from Emerald in the West to Yeppoon on the east and Gladstone in the South. We get patients from as far West as Longreach. About 25% of all our ED presentations are children below 16 years. Gladstone Hospital (3 paediatricians and one advanced trainee) takes some of our step-down patients.</p> <p>The Hospital provides a General Paediatric service with support for more complex cases from Queensland Children’s Hospital (QCH) and RBWH (for newborn) as the need arises.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services</p> <p>Emergency Department (Physical presence of Paediatrics in mixed ED)</p> <p>Outreach programs</p> <ul style="list-style-type: none"> <li>• Indigenous children a. ## The Prince Charles Hospital

<b>Hospital information and highlights</b>	<p>The Prince Charles Hospital (TPCH) within the Metro North HHS is a major teaching hospital located on Brisbane's northside. Originally opened in 1954 as the Brisbane Chest Hospital, and developing as a leader in cardiothoracic services, TPCH also offers emergency, general surgical, medical and orthopaedic services.</p> <p>In 2012, TPCH opened its new Children's Health Service which includes an accredited paediatric Emergency Department, Short Stay Unit, inpatient ward and outpatient service. The Hospital serves a population of more than 65,000 children aged 0 to 16 years from Ocean View, near Dayboro, north of Brisbane, to Gordon Park in Brisbane's inner northern suburbs. There were just over 29,400 paediatric emergency presentations in 2018, and this number is increasing each year. Similarly, our inpatient and outpatient occasions of service have also been increasing as demand for local paediatric care grows. We work collaboratively with an experienced paediatric allied health team.</p> <p>The Hospital provides a generalist model of service with trainees managing routine and complex cases in general paediatrics on the Children's Ward, Children's Emergency Department and Paediatric Outpatient Department.</p>
<b>Service type</b> (inpatient/outpatient/community)	Inpatient services General Paediatric Outpatient and Allied Health Clinics Children's Emergency Department

# Townsville University Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Townsville University Hospital paediatric service is unique. The Townsville HHS provides tertiary children’s services to a population of 750,000 people (of which 163,537 children are aged 0 to 14 years) from Mackay in the South to Thursday Island in the North and Mt Isa in the West. Secondary level paediatric services are provided to children in the Townsville Health Service District. In 2014, an estimated 42% of children who identified as being Aboriginal and /or Torres Strait Islander in Queensland were living in the North Queensland region. 40% of our admitted patients are indigenous patients.</p> <p>The Hospital provides a generalist model of service with trainees managing complex cases in General Paediatrics. Subspecialty support is provided locally and via telehealth and outreach visits in specialties including respiratory, endocrine, neurology, cardiac, renal, oncology, gastroenterology and rehabilitation within the paediatric unit. Townsville is a referral centre for North Queensland providing services to children in Paediatric Surgery, ENT, Neurosurgery, Orthopaedics, and Paediatric and Neonatal Intensive Care. The medical needs of these children are coordinated, and provided by the General Paediatric Service.</p> <p>The General Paediatric Team work closely with Subspecialty services which are based in Brisbane frequently using telehealth, phone consultation and outreach visits to support local care of children.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services</p> <p>Outreach programs to regional and remote centres (including Indigenous community)</p> <p>General Paediatric clinics</p> <p>Community Paediatric Clinics</p> <p>Child Protection Unit (in generalist model)</p> <p>Tertiary Neonatal Intensive Care Unit (including neonatal surgery)</p> <p>Paediatric Intensive Care Unit</p> <p>Child Youth Mental Health Service</p> <p>Local subspecialists in disciplines of endocrinology, diabetes, respiratory and sleep medicine, paediatric rehabilitation, neonatology and gastroenterology.</p> <p>Local Clinics in Endocrinology, Diabetes, Respiratory Medicine, Cardiology, Rehabilitation Medicine, Rheumatology, Neurology, Oncology, Haematology, Nephrology.</p> <p>Local Surgical services in Paediatric Surgery, Burns, ENT, Neurosurgery, Ophthalmology,</p> <p>Visiting services in major Paediatric Subspecialties</p>

<p><b>No. of beds</b></p> <p><b>Annual paediatric admissions</b></p>	<p>33 General Paediatric beds</p> <p>2,500</p> <p>6 PICU</p> <p>16 NICU and 28 SCN beds</p> <p>Adolescent Psych inpatient unit</p>
<p><b>No of births</b> (if applicable)</p>	<p>~3,000 in Townsville</p>
<p><b>RACP accreditation</b></p> <p>Please refer to the RACP website for up to date accreditation status</p>	<p>Maximum of 18 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ Acute Care (NICU)</li> <li>○ Community/Developmental</li> <li>○ General Paediatrics without a perinatal component</li> </ul> <p>Accredited to 2022</p>
