

# 2022 Paediatric Clinical Examination Preparation Program

Supported by the Queensland Basic Paediatric Training Network and the Queensland Children's Hospital

The Paediatric Clinical Examination Preparation Program (PCEPP) is a preparation course for Paediatrics and Child Health clinical exam candidates. The course content is delivered over a weekend.

## Course aims

Designed as an adjunct to hospital-based clinical exam preparation, this course aims to provide participants with:

- a broad overview of major issues and recommended learning for the paediatric clinical exam
- practical advice from topic experts for long and short case preparation and management
- helpful tips and tricks to improve skills and performance for the exam.

## Learning outcomes

At the end of the program, it is anticipated that participants will be able to:

- develop an organised, strategic approach to preparation for the RACP paediatric clinical examination
- identify the standard expected for the RACP clinical exam
- refine their approach to the long case and the short case
- identify unique aspects of the approach to both the long and short case for key subspecialties.

**Saturday 26 – Sunday 27 March 2022**

**Virtual attendance via Zoom**

Draft course program overleaf

## Registration

**Cost:** \$300 (incl. GST)

**Inclusions:** Includes registration and online access to weekend course, online access to recorded presentations and course notes.
