Hi All,

I will ensure that the temperature in this unit is set correctly at 22.5C. I will also continue to investigate putting a second sensor in this area to help with ensuring the meeting room also stays regulated.

Just for my clarity:

There is no office connected to unit 5.05, are we referring to unit 5.03?
If we are referring to unit 5.03 please note that the temperature sensor for this unit is located on the wall and therefore that sensor should be calibrated for the room temperature not the ceiling temperature. As per Peter's email we recommend that this office have a setpoint of 22.5 in the space.

Thanks Lyle & Sonda,

Yes, I shall confirm, and I understand that the temp has been re-set for that unit (5.03) to 24 degrees in the ceiling, aiming for 22.5 degrees at the desk height.

I shall advise if that is to change.

Thank you,
