

Do you have a patient, client or family who would benefit from child health support?

Are you unsure about how to make a referral to the Child, Youth and Family Health service?

What services do Child, Youth and Family Health provide?

- parenting support
- growth and development checks
- groups and support programs
- lactation and feeding support
- paediatric allied health
- counselling.

Child, Youth and Family Health services can work in collaboration with other health professionals to ensure efficient, effective and supportive care for families, infants and children.

**Contact the Child Health Access line for advice or to make a referral.**
