CICM accreditation	C6: Limited General Training (G6)
Unit highlights / benefits	<ul style="list-style-type: none"> • Regional referral centre for Downing Downs and south-west Queensland region, population 280,000. Serviced by local helicopter retrieval service • Hospital has all medical subspecialties except dermatology, and large surgical department including ENT, urology and (some) vascular. • Toowoomba Hospital is a University of Queensland teaching hospital and houses the main campus of the South-West Queensland Regional Rural Clinical School. • The first international centre with a rural and remote health care focus • Campus provides local health professionals and other researchers the opportunity to undertake research in a well resourced environment. Punch above our weight in research, actively involved in ADRENAL, SPICE, All-SPICE, PLUS, TARGET, TEAM trials. • Exposure to echocardiography and ultrasound • A great place to either begin your ICU training, with great consultant supervision and a supportive environment, or for the more senior registrar, a good environment to consolidate your knowledge in a flexible atmosphere where you can begin to take a consultant role • A regional hospital setting means we know and are friendly with the inpatient units, and work as a team, rather than in a silo! • Weekly formal education sessions and simulation training • Busy enough to be interesting, quiet enough for you to pursue other professional interests, be they study, research or other • Primarily 12-hour shifts, with either four day or 7 day blocks, depending on your own wishes and fellow registrars • RMO support on day shifts
