

BUTTON BATTERIES CAN KILL

Are these killer batteries in your home?

WARNING: if swallowed or inserted, button batteries can cause severe burns or death.

How accessible are button batteries in your home?

eg. car keys, thermometers, hearing aids, toys, novelties and watches

There may be no symptoms, **but look out for:**

COUGHING OR NOISY BREATHING

CHEST PAIN OR GRUNTING

DROOLING OR VOMITING

BLEEDING OR DISCHARGE

FOOD REFUSAL OR FEVER

Suspect a battery has been swallowed or inserted?

Immediately call the **Poisons Information Helpline (13 11 26)** for fast expert advice 24/7. Do not let the child eat or drink and do not induce vomiting.

Visit qld.gov.au/buttonbatteries and share this information with others.
