

Care Plan for the Dying Person

Supporting care in the last days of life

Family and carer information pack

The Care Plan for the Dying Person is a statewide clinical tool that supports multidisciplinary care in the last days and weeks of life for patients and their families.

This information pack has been developed as a resource to ensure that families and carers receive and have access to information relating to what to expect when their loved one is dying, and to provide carer support and bereavement care resources.

Information pack resources

This information pack includes a family and carer information fact sheet.

Clinical services can print resources relevant to their local area for families and carers that can be added to the information packs.

Suggested resources that can be added to the packs are:

Brochures

- [The Dying Process: Information for Carers – Palliative Care Australia*](#)
- [Understanding grief – Palliative Care Australia*](#)
- **Order these free brochures from Palliative Care Australia*
- [When someone dies: A practical guide for family and friends – Queensland Government](#)
- [During sad news and sorry business: Information for family](#)
