COMMUNITY SUPPORT AND REHABILITATION TEAM
(Formerly Community Rehabilitation Team & Community Sub Acute Program)

REFERRER INFORMATION

Community Support and Rehabilitation Team (CSRT) offers a supplementary demand management solution for the Hospital & Health Service by:
• providing support and rehabilitation to individuals who are at risk of or have presented / been admitted to an acute care facility
• directly responding to demand in the Emergency Medicine Departments and Ward areas
• utilising strategies to prevent health deterioration and avoid re-admission

Community Support and Rehabilitation Team provides short term (4-6 weeks), support and rehabilitation in a person's own place of residence, in a centre (Caloundra, Nambour or Tewantin) or a combination of both.

CSRT aims to improve the functional status of the person, using an interdisciplinary therapy plan which targets negotiated goals in agreed time frames. Periodic assessments using recognised functional outcome measures monitor the person's progress. Care is delivered by the CSRT team with assistance of private brokered providers.

Community Support and Rehabilitation Team can provide physiotherapy, occupational therapy, speech pathology, dietetics, nursing and social work. Other services which might be included are showering, cleaning, shopping and wound care depending on assessed needs. All ancillary services can be provided to the person whether they are receiving therapy in the centre or at home. The program does not fund meals or equipment. To facilitate attendance at appointments; transport can be arranged via HACC (over 65 years) or QCCS (under 65 years). A small charge applies to these subsidised services.

Where required a Case Manager is assigned to co-ordinate and monitor the person's progress through the program.
