Caboolture Hospital
RMO Training Opportunities in 2021

Caboolture Hospital is a part of Australia’s biggest and most diverse Hospital and Health Service delivering the best care via the best health care professionals. Caboolture Hospital is a 265 bed Hospital (including Mental Health). We are thirty minutes’ drive from Brisbane and the Sunshine Coast and located in an area growing both in demographics and infrastructure. Caboolture Hospital provides training opportunities for doctors pursuing generalist or specialist career pathways. Caboolture’s size as an accredited training facility places it in perfect stead to build your clinical competence and assist your professional advancement through the diverse range of clinical exposure and hands on experience you will gain in our friendly and supportive environment. Caboolture Hospital is currently undergoing extensive growth in size and services which will enhance your learning opportunities.

Caboolture Hospital is committed to changing the way health care is delivered. Our promise is to put people first, providing safe, effective, person-centred care. We strive to ensure our patients have equity of access, outcomes and experience, whilst nurturing a culture of teamwork, learning, improvement and being part of a community that provides connected healthcare. Caboolture Hospital is aiming to be the first hospital in Australia to be accredited in Patient and Family Centred Care. Our vision is to improve the health of our community by caring together.

This is your chance to make a difference!
Education Support

Caboolture Hospital has a very supportive and encouraging Medical Education Unit (MEU). The team, including the Director of Clinical Training (DCT), the deputy DCT, your Principal Medical Education Officers (PMEO) and Administration Officer, are always available and willing to provide advocacy and support.

The MEU works closely with our Deputy Director of Medical Services (DDMS) and Medical Administration Registrar. We also have a staff Psychologist working alongside our MEU team. Caboolture Hospital also has a Peer Support Program, Mentoring Program and the opportunity every term to attend a Pre-vocational Doctors Meeting with our Medical Executive team to discuss any training concerns or issues.

The MEU actively promotes its open-door policy. We provide support specific to your needs, be it in relation to a personal or professional matter. We continually monitor your training environment to ensure you are provided the best environment to learn and reach your learning objectives.

Caboolture’s Education and Skills Development Centre is an important training hub for our junior doctor teaching. The centre provides a simulation centre, linked to the Clinical Skills Development Service, offering healthcare simulation permitting junior doctors to practice procedures, refine communication techniques, gain experience in recognising and treating medical conditions, undertake multi-disciplinary teamwork training all in a safe and supported learning environment.

Learner centred education - a full weekly education program including, JHO and SHO focused education, Grand Rounds, Journal Clubs, elearning programs and unit tutorials with hands on practical sessions.

We have a state-of-the-art Education and Skills Centre with a large number of supervisors to support your ongoing training.

Our formal education programs include the Junior Doctor Professional Development Program (JDPDP) and Grand Rounds. In addition, you will have access to each Unit’s specific learning programs which include, for example, bedside teaching, department education, case presentation and meetings. You have the opportunity to gain learning experience from your day-to-day clinical services such as handover and ward rounds given the supportive nature of the supervisors at Caboolture Hospital.

Being a smaller hospital and given the high numbers of retention of JHOs and SHOs at Caboolture Hospital, you will have access to fantastic peer support. In addition, the wider team at Caboolture are extremely welcoming and supportive. We all want to see you become the best doctor you can be!

Workforce Support

The Medical Workforce Unit (MWU) is here to help you. The MWU team are easily accessible, friendly and always approachable. The MWU efficiently and effectively handles all recruitment, assignment of allocations, leave, AHPRA requirements, Department of Immigration requirements, provider and prescriber number requirements, and any other issues you may face beginning your career as a doctor.

Term allocations are assigned in order to meet your desired career path.
