Cairns and Hinterland Hospital and Health Service
Information Asset Register as at 30 August 2018

In the interests of transparency Cairns and Hinterland Hospital and Health Service provides the following details regarding information collected for the purpose of better health outcomes for Queenslanders. This information will be expanded over time. Access to the information within the Information Assets is aligned with Queensland legislative requirements. For further information please email ROI-CBH@health.qld.gov.au.

Aged Care Evaluation Information
Description: Profile of all clients assessed by the Queensland Aged Care Assessment Teams within the guidelines of the Aged Care Assessment Programs. The target population is 65 years and older and 50 years and older for Aboriginal and Torres Strait Islander people in public or private hospitals or in the community who require assessment of their need and eligibility for Commonwealth subsidised aged care services (residential or community based).

Aged Care Evaluation System (ACE)
Description: Collecting and reporting on the Aged Care Assessment Program Minimum Data Set Version 2. It is used by the entire aged care business area.

Aged Care Information Management Information
Description: Public aged care residential facilities information on financial, resident care and resource management.

Aged Care Information Management System (ACIMS)
Description: Used for resident management and billing.

Alcohol, Tobacco and Other Drug Services (ATODS) Information
Description: Data on all clients receiving treatment through Alcohol, Tobacco and Other Drug Services (ATODS). Information is collected from publicly funded government and non-government agencies providing alcohol and/or drug treatment services, including community-based ambulatory services and outpatient services.

Automated Anaesthetic Record Keeping (AARK)
Description: Providing a single, high-quality, Electronic Patient Record (EPR) across the perioperative environment. It comprises of a combination of data entered by clinicians and patient vital signs data collected automatically from a diverse array of biomedical equipment.

AUSCARE
Description: AUSCARE a web interface to the AUSLAB Laboratory Information Management System database.

AUSLAB
Description: Reporting and laboratory management software system.

Blood Transfusion Incident Reporting Information
Description: Information on adverse incidents arising from blood transfusions. It reports to the National Blood Authority for collation of national statistics.
**BreastScreen Queensland Information**
**Description:** A complete screening history for women participating in the BreastScreen Queensland Program through appointment management, clinical episode data capture and the generation of result and reminder notifications to women and their health providers. The scope is all participants in the BreastScreen Queensland Program (Queensland women aged over 40 years).

**Budget Planning Tool (BPT) Information**
**Description:** Financial and Payroll FTE data for multi-dimensional analysis at summary or transaction levels with applications for: Finance for managing dollars at Cost Centre and GL account level, Workforce and Establishment for managing FTE and labour business rules at Cost Centre, Pay class and position number level.

**Cerner (AppBar, OSIM, Powerchart, RIS)**
**Description:** Provides radiology and outpatient scheduling and reporting.

**Chemical Management Information**
**Description:** Documentation and information on chemical management as specified by the Work Health and Safety Act / Regulation 2011. This data primarily consists of safety data sheets, chemicals registers (ChemAlert stock holdings) for all Queensland Health agency work units, and risk assessments for work place tasks involving the use of chemicals.

**CHRISP Connect Information**
**Description:** Information on hospital acquired infection.

**CIMHA**
**Description:** CIMHA supports consumer and community health and safety by providing timely access to up-to-date clinical information across service settings and between Districts. It integrates and streamlines the functionality previously provided by three separate systems.

**Clean Hands Information**
**Description:** Data from audits of hand hygiene compliance.

**Clinical Decision Support System (CDSS)**
**Description:** CDSS provides standardised triage of patients/callers through a series of standardised questions. It can then match the appropriate level of health care to the patient’s/caller’s needs.

**Clinical Improvement Data Entry (CIDE)**
**Description:** A web-based data collection system for entering data directly into CPIC’s analytical and reporting environment. The purpose of CIDE is to improve data accuracy, data timeliness and eliminate the need for manual site validations (current practice).

**Clinical Incident Reporting Information**
**Description:** Information on clinical (patient) incidents, both potential and actual. Any Queensland Health employee is able to report a clinical incident on any networked computer across the state. This system provides easy access for staff to report and allows managers to record details of incident management and corrective actions in order to reduce preventable patient harm.

**CODEFINDER**
**Description:** Determining the optimal ICD codes and AN-DRG for an admitted episode of care. Also used in clinical costing analysis processes.
Consumer Feedback Reporting Information
Description: Information on complaints and compliments received from consumers of health services provided by Queensland Health. Any person is able to provide feedback about an aspect of Queensland Health.

Credentials Data Collection
Description: Credentialing information on Queensland public health system employees.

Decision Support System (DSS)
Description: DSS provides Queensland Health Business Intelligence Capability including Finance, HR Payroll, Patient Activity, Performance and Quality Reporting. Data is sourced from multiple source systems and enables centralised reporting functionality including graphical, geoanalytical and tabular displays.

Drugs of Dependence Information
Description: Information of dispensed controlled drug prescriptions - prescribing doctors, dispensing pharmacy, name and address of patient, type and quantity of drug dispensed; and details of legislative reports, legal approvals, admissions and discharges from Queensland Opioid Treatment Program.

ECRI-AIMS (EA) Information
Description: Health Technology (HT) whole of life asset management information for all Hospital and Health Services (HHS) and private clients.

eDRMS Platform Service
Description: The eHealth electronic Document and Records Management System (eDRMS) Platform Service is an electronic document and records management system platform service utilising the HP TRIM software suite—a document and records management solution provided by Hewlett Packard (HP) — which is available for use by the Department of Health, Hospital and Health Services and other associated health care providers.

Elective Surgery Waiting List Data Collection
Description: Information on patients who have been registered on an elective surgery waiting list, permitting the reporting of patients waiting at a census date, and patients removed from the waiting list.

Emergency Department Data Collection
Description: Information on patients’ journey through the Emergency Department (ED) that describes the care and treatment provided and provides alerts.

Emergency Department Information System (EDIS)
Description: Providing care providers with visibility of the whole emergency department including a graphic display of all beds and patients, patient information and ability to track patient conditions, treatments and movements.

Enterprise Discharge Summary (EDS) Support
Description: EDS is a web based application to enable clinicians to generate discharge summary containing timely clinical information relevant to post discharge healthcare providers.
User must have valid login credentials to access the application - if not, please request access via the Apply for access button below.

Enterprise-wide Liaison Medication Information
Description: Patient specific medication information.
Enterprise-Wide Liaison Medication System (eLMS)
Description: A central repository of patient specific medication information to facilitate the continuity of medicine management across the community-hospital interface. This enables sufficient information for patients and their carers to safely manage their medications at home.

Environment for Scheduling Personnel (ESP)
Description: Scheduling staff, generating rosters and determining staffing and productivity levels.

Finance and Materials Management Information
Description: Data is collected for corporate business processes relating to Finance.

Financial and Residential Activity Collection (FRAC)
Description: Detailed information on public hospital establishments including expenditure, revenue and staffing (FTE) levels and identify specialised service indicators for hospitals for national and state reporting. The scope is all Queensland public hospitals, public residential psychiatric hospitals and public residential aged care facilities.

Food Complaints and Samples Information
Description: Information on the management of food complaints and food samples in Queensland.

Food Poisoning Information
Description: Information on all faeces and vomitus samples from complainants who claim to have contracted food poisoning and the results of the analysis.

Forensic Pathology Histology Reports
Description: Diagnostic information on tissue specimens submitted for histological examination.

Group A Streptococcus sp. (GAS) Information
Description: Information on Queensland patients with GAS isolates.

HBCIS
Description: Patient administration for hospital operations.

Health Infrastructure Reporting Information
Description: Captures specific project information on the majority of Tiers 1 to 4 Health Infrastructure Branch projects.

Health Service Provider Directory (QFinder)
Description: A directory of health and community services and a key electronic resource for use within the 13 HEALTH service, via the Queensland Health intranet site (QHEPS) and by the general public via the QFinder website.

Human Immunodeficiency Virus (HIV) Information
Description: Test results of surveillance and diagnostic services for the detection of antibody to Human Immunodeficiency Virus (HIV), HIV antigen, and/or HIV viral ribonucleic acid (RNA).

I-Net Computerised Maintenance Management System (ICMMS)
Description: Allowing maintenance requests to be raised via a web form and for request status to be checked. This is fed by a SAP upload each day, and produces the maintenance list for the engineering department at some sites.
Infection Control Surveillance Information
**Description:** Healthcare-associated infection data comprising bloodstream, surgical site and multi-resistant organism infections, in addition to staff occupational exposures.

Interpreter Service Information System (ISIS)
**Description:** Books interpreters, confirms these bookings, verifies services were provided including timeframes and automatically calculates costs to assist invoicing.

Incident Management System (IMS.Net)
**Description:** Recording and collating Workplace Health and Safety incidents throughout Queensland Health. Includes modules for Workers Compensation and Workplace Rehabilitation.

Lead Exposure Notifications Information
**Description:** Information on patients with excessive lead exposure in Queensland, including demographics, blood lead pathology test results and the source of lead exposure.

Leptospirosis Information
**Description:** Records demographic information on the scope and prevalence of leptospirosis throughout Australia.

List of Approved Medicines (LAM)
**Description:** List of all medicines approved for use in Queensland public hospitals.

Malarial Parasites information
**Description:** Demographic, and species identification information of malarial parasites.

Medical Aids Subsidy Information
**Description:** Statewide client and prescriber details, supplier (product) details and product details.

Meningococcal Information
**Description:** Demographic, antibiotic profile and typing data of Queensland meningococcal isolates information.

Mental Health Activity Data Collection (MHADC)
**Description:** Statewide collection of demographic, clinical and administrative information on outpatient, community consultation liaison and outreach service contacts provided by specialised mental health services.

Mental Health Establishments Collection (MHEC)
**Description:** Statewide information on the range, level and cost of services available in Queensland mental health establishments.

Microbiological Food Analysis Information
**Description:** Information on all food samples submitted for microbiological analysis and their results.

Monthly Activity Collection (MAC)
**Description:** Summary data on admitted and non-admitted patient activity and bed availability from public acute hospitals, public residential psychiatric hospitals and public residential aged care facilities. The collection also includes summary data on residents registered for care in multi-purpose health services including bed availability.

MOSAIQ
**Description:** Oncology Information Management System (OIMS) for North Queensland. Used by staff across all streams in Oncology and other departments supporting Oncology in hospitals across the North Queensland Region. The system is the primary medical chart for Oncology patients, and is also used in the administration of Radiation Therapy and Medical Oncology/Haematology treatments.
Newborn Bloodspot Screening Information
Description: Information on newborn screening tests which involves the detection of markers in blood for a set of 30 rare conditions.

Notifiable Diseases Information
Description: Information on individual cases that need to be managed and clusters of cases that may identify public health risk, population health data which provides information on patterns of disease.

Oral Health Information
Description: Contains patient details, patient treatments, patient administration and patient access scheduling.

Organ and Tissue Donation Information
Description: Data of Queensland's organ and tissue donation for transplantation.

Patient Related Incident Management System (PRIME Clinical Incidents)
Description: Allowing the capturing and analysis of information related to consumer feedback, clinical (patient) incidents and risk data.

Patient Related Incident Management System (PRIME Consumer Feedback)
Description: Allowing the capturing and analysis of information related to consumer feedback, clinical (patient) incidents and risk data.

Pathology Information (AUSLAB)
Description: Statewide public hospital pathology clinical and business critical information.

Perinatal Data Collection
Description: Data on all births that occur in Queensland. The collection is a basic source of information for research into obstetrics and neonatal care; to provide information on neonatal morbidity and congenital anomalies.

Population Health Status Information
Description: Information for the assessment of prevalence of population health indicators in the adult and child Queensland population. It is used for state and national reporting, and for policy and practice planning and evaluation.

Pneumococcal Information
Description: Demographic, antibiotic profile and typing data of Queensland Pneumococcal isolates information.

Queensland Cancer Information
Description: Information on new cases of cancer and statistics about incidence, prevalence, survival and mortality.

Queensland Health Clinical Costing Information
Description: Information on hospital costs, revenue, ABF (Activity Based Funding) data and other management information at both the product line and patient levels across Queensland Health's major public hospitals.

Queensland Health Non-Admitted Patient Data Collection (QHNAPDC)
Description: Demographic data and service event information on all non-admitted patients from all public hospitals within Queensland.

Queensland Health Pap Smear Information
Description: Pap smear results and screening history information all Queensland women who have Pap smear and related tests performed and quality assurance information for laboratories.
Queensland Health Pharmacy Information
Description: Public hospital pharmaceutical medication inventory control, dispensing and distribution information.

Queensland Hospital Admitted Patient Data Collection (QHAPDC)
Description: Demographic data and clinical information on all admitted patients from all public acute and psychiatric hospitals, licensed private hospitals and day surgery units within Queensland.

Queensland Needle and Syringe Programs Information
Description: Information on Needle and Syringe Program (NSP) client characteristics and activity including consumption of equipment in Queensland.

Queensland Outcomes Collection (QOC)
Description: Statewide information on mental health consumer outcomes and case complexity across wide range of health and social domains including psychiatric symptoms, physical health, functioning, relationships and housing.

Queensland Radiology Information
Description: Information on persons who have dealings with radiation sources.

Rural and Remote Nursing Relief Program (RRNR)
Description: Assisting the coordination of relief staff from regional Queensland Health facilities to the rural sector.

Rural Training Case Management
Description: Contains demographic information, education, training and employment data and case management records.

Salmonella Information
Description: Information on Queensland patients with Salmonella isolates.

Secure Transfer Service (STS)
Description: Securely transferring sensitive information externally to QH, and generating electronic signatures and software services for authentication to Queensland Health systems and resources.

SelfService Centre (SSC)
Description: A convenient way to register information and communication technology (ICT) requests online.

Services Information Management Information
Description: Information that supports the planning and operational flow of allocated funding from State and Commonwealth budget sources to health service organisations, primarily outside of Queensland Health.

Sexual Health Information
Description: Clinical information on patients who attend Queensland Health Sexual Health Clinics.

SPA - (Staff Protect)
Description: A component of a planned process change in all Queensland Health facilities that will ensure that we comply with the Queensland Health Policy for Immunisation of Health Care Workers and the Workplace Health and Safety Act 1995.

Standard Desktop Operating Environment (SOE)
Description: Includes the Windows Operating System and utilities, applications and other software required for everyday PC operations within QH.
SATR  
**Description:** Database used to store statewide data collections for which the Clinical Access and Redesign Unit are custodians, including elective surgery, emergency, specialist outpatient, gastrointestinal endoscopy and radiation therapy.

Telehealth  
**Description:** Extending the way we communicate in Queensland Health with patients, nurses, doctors and other specialists by using a TV screen and digital camera. Aimed at improving access to safe and sustainable health services.

The Viewer  
**Description:** The Viewer is a read-only web-based application that will provide authorised Queensland Health clinical and support staff faster access to patient summary information currently stored in a number of different clinical and administrative systems.

Travel Manager  
**Description:** Supporting the coordinated management of patient and staff travel.

Vaccination Immunisation Verification System (VIVAS)  
**Description:** Recording vaccinations provided in Queensland and orders for and distribution of vaccines to service providers.

Vaccination Information  
**Description:** Immunisation vaccination information for children up to 7 years old ('childhood'), School Based Vaccination program (SBVP), and Other 'at risk' groups to manage outbreaks.

Voice and Page Services  
**Description:** Providing a robust, secure, architected telecommunication environment that supports the delivery of health services across the continuum of care. This is with particular regard to the sensitivity of the information being managed and transmitted, the increasing mobility of the workforce, and the growing need to share appropriate information with non-Queensland Health personnel.

Web Content Management System (SQUIZMATRIX)  
**Description:** Providing an automated way of authoring, approving, indexing, deploying and maintaining information published on QH's internet and intranet.

Workplace Incident Management Information  
**Description:** Information on workplace health and safety accidents and near misses arising from work, a workplace activity or environment, that affect staff, visitors or other persons.

Your Experience of Service (YES) Survey Collection (Mental Health)  
**Description:** Mental health inpatient and community services consumer perceptions about specific areas of the care they receive within a specialised mental health service. This information is used to inform and support service evaluation and improvement initiatives.
