## Caboolture Hospital

<p><b>Hospital information and highlights</b></p>	<p>Caboolture Hospital is located north of metropolitan Brisbane in the Moreton Bay Regional Council area and is part of the MNHHS. The hospital provides emergency, inpatient and outpatient services for adults and children up to a Clinical Service Capability Framework level 4 (CSCF V3.2),</p> <p>Caboolture Hospital serves a population of 160000. We are 40 minutes from Brisbane and 40 minutes from the Sunshine Coast.</p> <p>Caboolture is in an area of very rapid growth. There are huge number infrastructure builds currently underway in this area. Our catchment between now and 2036, will see an additional 122000 people to 260000 people. There are approximately 27,680 children in our catchment, and we expect to see an increase of 20,866 by 2036.</p> <p>Caboolture LPA had the highest proportion of developmentally vulnerable children in MNHHS</p> <p>Caboolture Hospital has a busy Paediatric service, dealing with a rapidly growing community with highly variable social demographics. Our emergency department is amongst the busiest in the state, and we have around 70000 presentations per year and over 3000 admissions to the ward. About 25% of these presentations to ED are children.</p> <p>Consequently, we often see many uncommon or unusual paediatric presentations offering excellent learning opportunities to our trainees in a well-supported environment.</p> <p>We actively encourage our trainees participating in educational activities, quality improvement activities, and guide towards clinical examination preparation.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and Paediatric Short Stay services</p> <p>Neonatal Unit</p> <p>General Paediatric outpatient clinics</p> <p>Child Protection Clinic, Diabetic and Endocrine clinics, Paediatric Respiratory clinics.</p>
<p><b>No. of beds</b> <b>Annual paediatric admissions</b></p>	<p>12 General Paediatric beds with a capacity to go up to 17 in winter months, 12 Special Care beds (expanding to 17)</p> <p>The Paediatric Unit cares for around 4,000 children and infants each year under the age of 16</p> <p>Special Care Nursery admissions around 430 babies per year</p> <p>The Outpatient service gets around 200 new Paediatric Referrals per week</p>
<p><b>No of births</b> (if applicable)</p>	<p>2,000births/year. Infants above 32 weeks of gestation are cared for in our SCN. We offer CPAP and commence ventilation/surfactant if required before retrieving unwell neonates.</p>

<p><b>RACP accreditation</b></p> <p>Please refer to the RACP website for up-to-date accreditation status</p>	<p><b>Advanced Training:</b></p> <p>We offer 12 month of core training with perinatal component.</p> <p><b>Basic Training:</b> We are a Secondment Hospital for Paediatric Basic Training (Maximum 12 months rotation from primary hospital)</p> <p>We are accredited to February 2026 for basic and advanced training</p>	
<p><b>Potential rotations</b></p>	<p>General Paediatrics</p> <p>Special Care Nursery</p> <p>Specialist Outpatient Clinics – autism, behaviour, ADHD</p>	
<p><b>Staffing and supervision</b></p>	<p>8 Paediatricians comprising 6 FTE including Director</p> <p>Sub-specialists in Paediatric Endocrine and Respiratory medicine</p> <p>9 registrars or PHOs</p> <p>Supervision, registrar support and clinical teaching are high value activities in our department.</p>	
<p><b>Teaching and learning</b></p>	<p>Weekly paediatric grand rounds</p> <p>Daily Consultant led rounds</p> <p>Protected teaching for Registrars and PHOs every weekly</p> <p>Monthly Radiology meeting</p> <p>Mandatory advanced neonatal resuscitation programme and Neonatal Stabilisation courses</p> <p>Monthly Paediatric Morbidity and Mortality meetings</p> <p>Three Monthly Perinatal Morbidity and Mortality meetings</p> <p>Opportunity to complete quality improvement including Audits/ research with interested active support available</p> <p>Trainees close to obtaining fellowship can be offered to participate in after hour on calls, backed up by the consultants i.e. we support peer reviewed preparation for their consultant careers</p>	
<p><b>Profile of work</b></p>	<p>Rotating roster</p> <p>Ward responsibilities with close, on site supervision and after hours within 30 minutes response time</p> <p>Outpatient Clinics and attendance in child protection meetings</p> <p>Participation in Multidisciplinary team meetings.</p> <p>Specialist clinic coverage – General Paediatrics, diabetic Clinic, Child Protection</p> <p>Teaching responsibilities – Formal weekly RMO teaching, Intern/RMO supervision, Year 4 medical students</p>	
<p><b>Hospital web link</b></p>	<p><a href="https://metronorth.health.qld.gov.au/caboolture/">https://metronorth.health.qld.gov.au/caboolture/</a></p>	
<p><b>Hospital contact</b></p>	<p>Name:</p> <p>Tel:</p> <p>Email:</p>	<p>Dr Salil Gandhi</p> <p>(07) 54338090</p> <p><a href="mailto:Salil.Gandhi@health.qld.gov.au">Salil.Gandhi@health.qld.gov.au</a></p>

## Cairns Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Cairns and Hinterland Hospital and Health Service Paediatric department has the responsibility of providing public hospital and community services to a population of approximately 67,000 children and young people. The primary catchment of the CHHHS covers an area of 142,900 km<sup>2</sup> from Tully in the south, Cow Bay in the north and Croydon in the west. The outer western region of our Service encompasses extremely remote communities. The paediatric department also supports the acute provision of care to children in the Torres and Cape HHS to the North as well as a number from PNG.</p> <p>Close to 93% of our paediatric work is managed locally and there is excellent support from our local adult ICU for severely unwell children who are then managed in conjunction with/transferred to our regional Paediatric ICU in Townsville Hospital.</p> <p>We manage a very wide range of conditions including all those commonly seen in all metropolitan areas but also a significant number of tropical diseases along with problems related to socio-economic disadvantage. Considering our population's demographics and as the primary referral centre for TCHHS to the North of us, a substantial proportion of our work is with children and families who identify as Aboriginal and/or Torres Strait Islander - as such we are very focused on culturally appropriate indigenous healthcare.</p> <p>We provide local sub-specialist services in paediatric cardiology, endocrinology and diabetes, paediatric allergy and rheumatology along with paediatric oncology services for the region in partnership with the Queensland Paediatric Haematology Oncology Network.</p> <p>We have strong established links with the Queensland Children's Hospital in Brisbane and host visiting sub-specialist clinics from respiratory/CF and sleep medicine, genetics, haematology, oncology and metabolic medicine along with a paediatric surgical outpatient service from Townsville Hospital.</p> <p>The unit is committed to providing consistent and high-quality supervision to all our trainees, ensuring professional development along with utilisation of learning opportunities and consultant support.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient and outpatient services paediatric medical services Outreach programmes and Community Development Services Paediatric endocrinology, cardiology, allergy subspecialist clinics Level 5 SCN</p>
<p><b>No. of beds</b></p> <p><b>Annual paediatric admissions</b></p>	<p>16 bed paediatric ward (flexing to 22 beds) with a separate 8 bed adolescent unit</p> <p>22 funded SCN cot spaces</p> <p>There are about 6000 separations each year with the majority of work being acute (~80%). There are ~30,000 children who present to ED per annum.</p>

<b>No of births</b> (if applicable)	Approximately 3,000 per annum						
<b>RACP accreditation</b> Please refer to the RACP website for up to date accreditation status	<p>Maximum of 12 months of core training</p> <p><b>Accredited category rotations</b></p> <ul style="list-style-type: none"> <li>○ General Paediatrics (Rural) – with a perinatal component</li> <li>○ For 12 months training the options are: <ul style="list-style-type: none"> <li>• 12 months GP</li> <li>• 6 months GP and 6 months CD</li> </ul> </li> <li>○ For 6 months training <ul style="list-style-type: none"> <li>• 6 months of GP only</li> </ul> </li> </ul> <p>Accredited to 2023</p>						
<b>Potential rotations</b> (depending on availability)	<p>General Paediatrics</p> <p><i>Not all these positions are fixed for advanced trainees in general paediatrics but can be organised by prior arrangement. Other options are possible depending upon trainee requirements and available positions.</i></p>						
<b>Staffing and supervision</b>	<p>Director of Paediatrics</p> <p>Paediatricians (n=10, 8.4FTE including Director)</p> <p>Sub-specialists in paediatric cardiology, endocrinology and neonatology</p>						
<b>Teaching and learning</b>	<p>Weekly protected registrar/PHO teaching</p> <p>Weekly QCH telehealth Grand Rounds, Paediatric X-ray meeting</p> <p>Daily consultant ward rounds</p> <p>Morbidity and mortality meetings (including interdepartmental)</p>						
<b>Profile of work</b>	<p>Full shift roster (1:4 weekends)</p> <p>Ward or nursery responsibilities</p> <p>Clinic coverage</p> <p>Research and presentations</p> <p>Teaching responsibilities (unit, peer and junior staff)</p>

## Redcliffe Hospital - last updated 2021

<p><b>Hospital information and highlights</b></p>	<p>The Redcliffe Hospital Paediatric Unit is a busy service, managing approximately 2,500 separations per year with an average length of patient stay of approximately 1 day. The Paediatric Unit is made up of multiple outpatient clinics, a children's ward and a special care nursery (SCN).</p> <p>Moderately sick neonates are cared for in the SCN, a level 4 nursery equipped with 10 cots and facilities to undertake continuous positive airway pressure for infants greater than 1,500 grams and/or 32 weeks gestation as well as short term assisted ventilation for infants prior to their transfer. Neonates requiring intensive care are stabilised in the SCN prior to transfer to the Royal Brisbane and Women's Hospital (RBWH).</p> <p>The children's ward at Redcliffe Hospital is funded for 10–14 beds (with 16 beds physically present). Medical and surgical patients are admitted to the children's ward. Selected orthopaedic cases are currently managed at Redcliffe hospital.</p> <p>The Paediatric Unit sees a broad mix of inpatient and outpatient general paediatric conditions. Most paediatric admissions are for the management of acute illness and hospital stay is very short, usually less than 2 days. Inpatients are predominantly of preschool age, with the most common diagnoses being bronchiolitis, chest infection (including pneumonia), urinary tract infection, gastroenteritis and other viral infections. Serious bacterial infections such as meningitis may also be managed. Young children with feeding and growth problems are often admitted. Endocrine conditions including diabetes mellitus as well as neurological conditions such as epilepsy and developmental delay are seen less frequently.</p>
<p><b>Service type</b></p>	<p>Inpatient, outpatient and community</p>
<p><b>No. of beds</b> <b>Annual paediatric admissions</b></p>	<p>10–16 paediatric beds and 10 neonatal beds 2,291</p>
<p><b>No of births</b> (if applicable)</p>	<p>Approximately 1,700 per annum</p>

## Redland Hospital - last updated 2021

<b>Hospital</b>	Bayside Health Services Redland Hospital, Cleveland, Qld and Wynnum-Manly Community Health Centre, Gundu Pa, Qld
<b>Hospital information and highlights</b>	<p>Redland Hospital is a non-tertiary district hospital located in the Bayside suburb of Cleveland in outer Metropolitan Brisbane. It services a population of over 150,000 people. The Paediatric Department at Redland Hospital looks after a divergent community with a wide range of patients. Our services include a Paediatric Emergency Department seeing nearly 15,000 paediatric patients annually, inpatient children's ward with short stay unit, a level 4 Special care Nursery, busy birth service and outpatients. We also care for children and family's resident on the Islands of the Moreton Bay being North Stradbroke, Macleay, Russell, Lamb and Coochiemudlo which are classified as remote and rural. The Islands have a large aboriginal and Torres strait islander community, a significant proportion of the community is at risk with lower socioeconomic status with child development needs. We are involved in the holistic management of children with acute and chronic neonatal and paediatric conditions. Clients may access the service from birth to the completion of high school. Redland hospital does not have any paediatric subspecialists, we co-ordinate care of complex subspecialist cases with tertiary children's hospital Queensland Children's Hospital (QCH). Wynnum-Manly Community Health Centre, Gundu Pa is the new state-of-the-art outreach public health facility located 15km from Redland Hospital. A range of services are available under one roof, including a 24-hour Primary Care Centre, Addiction and Mental Health, Allied Health, Child Development, Chronic Disease, Oral Health and Specialist Outpatients. The 24-hour Primary Care Centre us a walk-in service and designed to treat less urgent/minor injuries and illnesses.</p> <p>We also provide acute care services to newborn babies born at the Redland Mater Private Hospital which is located on the campus.</p>
<b>Service type</b> (inpatient/outpatient/community)	<p>Inpatient and outpatient services:</p> <p>Day Case: Rheumatology, Endocrine Testing, Gastrostomy, Haematology/Oncology</p> <p>Paediatric emergency services</p> <p>Outreach community health clinics</p> <p>General Paediatric Clinics, Neonatal follow-up clinics, Growth and Developmental Clinics, Diabetes Clinic, Surgical Clinics, Dental Lists</p> <p>Level 4 Neonatal Service</p>
<b>No. of beds</b> <b>Annual paediatric admissions</b>	<p>General Paediatric Beds: capacity 11, including 4 short stay beds</p> <p>SCN Beds: 10 with 2 emergency admission cots</p> <p>Annual Paediatric Admissions: 1,800</p>

## The Prince Charles Hospital

<p><b>Hospital information and highlights</b></p>	<p>The Prince Charles Hospital (TPCH) within the Metro North HHS is a major teaching hospital located on Brisbane's northside. Originally opened in 1954 as the Brisbane Chest Hospital, and developing as a leader in cardiothoracic services, TPCH also offers emergency, general surgical, medical and orthopaedic services.</p> <p>In 2012, TPCH opened its new Children's Health Service which includes an accredited paediatric Emergency Department, Short Stay Unit, inpatient ward and outpatient service. The Hospital serves a population of more than 75,000 children aged 0 to 16 years from Ocean View, near Dayboro, north of Brisbane, to Gordon Park in Brisbane's inner northern suburbs. There were 33,297 paediatric emergency presentations in 2021, and this number is increasing each year. Similarly, the Paediatric inpatient and outpatient occasions of service have increased as demand for local paediatric care grows. The Team works collaboratively with an experienced paediatric allied health team.</p> <p>The Hospital provides a generalist model of service with trainees managing routine and complex cases in general paediatrics on the Children's Ward, Children's Emergency Department and Paediatric Outpatient Department.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p>Inpatient services</p> <p>General Paediatric Outpatient and Allied Health Clinics</p> <p>Children's Emergency Department (CED)</p>

# The Townsville University Hospital

## Hospital information and highlights

The Townsville University Hospital (TUH) is in the suburb of Douglas in Townsville the largest City in the Tropical North of Australia and is adjacent to James Cook University.

As well as providing services to the local population TUH is a tertiary referral hospital for North Queensland supporting the people who live in the region from the Torres Strait Islands, and Cape York Peninsular in the north, the Gulf of Carpentaria and Mt Isa to the West, to Coal mining towns to the southwest and Mackay and the Whitsundays to the south. The 3 large population centres on the east coast are Townsville, Cairns and Mackay, and the total population in North Queensland is around 750,000.

There are large urban Aboriginal and Torres Strait Islander populations in the cities 8-10% and many small largely Aboriginal or Torres Strait Islander populations in communities across the region. The paediatric Inpatient unit at TUH has 30-40% Aboriginal or/and Torres Strait islander separations.

TUH is the major teaching hospital for James Cook University's schools of medicine, nursing, and allied health and for the Barrier Reef Institute of TAFE. It is the only Trauma Centre and has the only Maternal Foetal Medicine unit, Neonatal Intensive Care Unit and Paediatric Intensive Care units in Australia North of Brisbane. Townsville University Hospital provides the latest in cardiac, obstetric, gynaecological, paediatric, neurosurgical, orthopaedic, cancer, mental health, neonatal, allied health, anaesthetic and intensive care services to the community. The Emergency Department has a dedicated paediatric area, and in-department radiology service.

The TUH Paediatric Service serves a population of about 160,000 children aged 0 to 14 years in North Queensland. In the 2016 census Townsville-Mackay and Cairns-Atherton Indigenous regions were both in the top 10 most populous Indigenous regions throughout Australia. The Indigenous median age was 22 years (compared to 38 in the non-indigenous population with 1/3 aged less than 15 years).

The average number of admissions to the paediatric ward per year is 6000; the average number of paediatric presentations to the Emergency department per year is 18,000, with 2,500 admissions occurring via the emergency department per year. The number of deliveries per year is 2500-3000, with an average of 250 to 300 NICU admissions and 1093 special care admissions per year.

The Townsville Hospital paediatric service is a unique service providing tertiary level support in a regional setting.

The Hospital provides services with using a generalist model, with subspecialty support. Trainees working in General Paediatrics care for complex patients with diagnoses from all of the major medical specialties. Subspecialty paediatric support is provided locally (Respiratory, Endocrinology, Gastroenterology, Cardiology, Rehabilitation, Community Paediatrics) and via telehealth and outreach visits (Renal, Oncology, Haematology, Rehabilitation, Respiratory, Metabolic, Neurology).

	<p>Townsville is a referral centre for North Queensland providing services to children in Paediatric Surgery (general, urology and neonatal surgery), ENT including cochlea implants, Neurosurgery, Orthopaedics, and Paediatric and Neonatal Intensive Care. The medical needs of these children are coordinated and provided by the General Paediatric Service.</p> <p>TUH has a dedicated Child Development, Community Paediatric and Child Youth and Adolescent Mental Health Service.</p> <p>TUH department of Paediatrics provides regular outreach services to several rural communities, and has a dictated child development service, across multiple sites.</p>
<p><b>Service type</b> (inpatient/outpatient/community)</p>	<p><b>Inpatient services</b></p> <ul style="list-style-type: none"> <li>• General Paediatric Inpatient Unit.
