To assist with ensuring patient, student and staff safety, specific training must be completed by students. It is essential that accurate records of this training are maintained by each Queensland Government Hospital and Health Service.

These guidelines provide an overview of:

- Training requirements for allied health students as per the National Safety Quality Healthcare Service (NSQHS) Standards, OH & S, legislative and other authority requirements.
- Responsible actions of parties involved in allied health student placements.
- Requirements for the recording of training completion by allied health students who undertake a placement within a Queensland Government Hospital and Health Service.

Responsible actions of Universities:

Universities, in collaboration with Queensland Government Hospital and Health Services, are requested to ensure that students are provided with the appropriate training to support their safe and active engagement in clinical placements. The completion of training modules prior to placements will facilitate the early commencement of clinical learning on placements.

It is requested that universities follow the steps detailed below:

- Ensure that all training able to be undertaken off-site (i.e. non-site specific training) is completed by allied health students, including the required annual refreshers (refer to the ‘Allied health student training requirements’ table in this document).
- Ensure that students complete the Student Orientation Requirements as mandated on the Student Deed and Orientation Website and keep relevant documentation as required.
- Ensure that allied health students receive and maintain the ‘Evidence record of allied health student training’. (N.B. signature and date is required against each of the completed training requirements).
- Ensure that allied health students are aware of the requirement to provide a copy of the ‘Evidence record of allied health student training’ at the commencement of each placement.

Responsible actions of allied health students:

- Complete all modules in Allied health student training requirements table - Part A below, including annual refreshers, using the links on the ‘Training requirements for student placements’ page, prior to attending any Queensland Government Hospital and Health Service placement.
• Complete the *Student Orientation Requirements* as mandated on the Student Deed and Orientation Website and provide relevant documentation to their university as required.

• Maintain the ‘Evidence record of allied health student training’ with signature and date against completed training modules.

• Provide a copy of the ‘Evidence record of allied health student training’ to Queensland Government Hospital and Health Service clinical educators at the commencement of each placement.

Responsibilities of staff involved in clinical education at each Queensland Government Hospital and Health Service:

• Arrange for any on-site training requirements, within specified timeframes, as per the ‘Allied health student training requirements’ table in this document.

• Obtain a copy of each allied health students ‘Evidence record of allied health student training’ at the beginning of each placement.
  o Ensure that all non-site specific training modules (once off and annual) are met at commencement of a placement (N.B. If any training requirements are not completed by a student it is at the discretion of a Queensland Government Hospital and Health Service to withdraw a student placement).
  o Keep an electronic copy of the ‘Evidence record for allied health student training’ for each student and save this document for evidence purposes.

• Provide the collected data regarding allied health student training completion to the designated allied health representative in your Hospital and Health Service on an annual basis (minimum requirement).
## Allied health student training requirements

### PART A: COMPLETE PRIOR TO PLACEMENT

Training in Section 1 must be completed prior to placement and training in Section 2 must be completed annually.

### Section 1 – Training that is not site specific and that must be completed prior to placement
