Data depends on accurate recording of destination hospital into e-Timesheets by all relevant staff.

Data extracted from e-Timesheets reporting cube.

Data is taken from reporting cubes. Data is not to be used for official reporting.

Data provided to Rowan Tucker, RTI Decision Maker, Privacy and Right to Information Unit on 26/08/2019 and provided with the understanding that any necessary approvals have been obtained prior to it's release outside the organisation.

Please contact the QAS Operational Business Intelligence & Planning Unit for any queries: qasobip@ambulance.qld.gov.au

Caveats:

Please consider the following when interpreting this data:

- The reporting of timesheet data is based on pay cycles and therefore does not match exactly to financial years, or the date range requested.
- Average meal overtime hours worked is calculated as total hours / count.
- Average number of broken meals is calculated as number of units / count.
- Average length of shift overruns is calculated as total hours / count. This is aggregated for shift extension of less than two hours and greater than two hours.
