Toothbrush bag pattern

1. Cut a strip of cotton drill 84cm x 14cm

2. Fold strip in half

3. Sew along side seams 1cm from long edges.

4. Turn inside out and fold end raw edges in 2cm. Stitch down to hold. No raw edges should be visible.

5. Stitch a strip of velcro at either end so that when folded in half the bags ends will secure.

6. Fold strip in half

7. Stitch side seams.

Finished bag is double thickness of material and approximately 20cm long and 12cm wide, with the velcro stitched inside open end.

Folded end.
