First sod turned for Caloundra Health Service redevelopment works

A sod turning ceremony was held at Caloundra Health Service (CHS) today to mark the start of the $17 million redevelopment works at the facility.

Badge Constructions (Qld) Pty Ltd Construction Manager, Kent Belcher, joined Sunshine Coast Hospital and Health Service (SCHHS) Acting Chief Executive Scott Lisle and CHS Nursing Director/Facility Manager, Dave Johnson, in turning the first sod.

Mr Lisle welcomed Badge Constructions as partners in the project.

“This project will take about 12 months to complete and will deliver improvements to the facility including expanded palliative care and ophthalmology areas, and refurbishments to the diabetes, outpatient, community service and minor illness and injuries clinics,” he said.

Mr Johnson said this was an important project for the Caloundra community and for CHS staff.

“Badge Constructions have previously worked at the Caloundra Health Service site and we look forward to re-engaging with them on this project,” Mr Johnson said.

The redevelopment of the CHS will be completed in four stages ensuring minimal disruption to the service delivery.

Mr Belcher said Badge Constructions were excited and keen to be part of this local project. Construction will commence next week and is expected to be completed by late 2018.
