

Mater Health Service

First Core Year of Advanced Training for Gastroenterology

Mater Hospital Brisbane provides a broad tertiary experience in IBD, hepatology, general gastroenterology and interventional gastroenterology (ERCP / EUS / stent placement / EMR) for the advanced trainee.

The job has a busy consultation and outpatient load and involves supervision of a resident, teaching of medical students and RACP exam candidates and working in a shared on-call roster with a senior registrar and non-core gastroenterology trainee.

Two protected procedural training lists are available for the advanced trainee. There are multiple opportunities for supervised projects. All the consultants in the unit are highly approachable and keen to work with trainees. There are a wide variety of research, audit and quality improvement projects available in the department.

Interested candidates can contact Dr Marianne Mortimore the Director of Gastroenterology Mater Hospital Brisbane (Marianne.mortimore@mater.org.au) if they are seeking more information.
