

Opt-in form for Queensland Health facilities

Queensland Health facilities eligible to participate in the program need to complete this opt-in form.

The maximum medication that can be ordered every six months will be based on previous Pathology Queensland test results for chlamydia, gonorrhoea and trichomoniasis and relies on completion of the Aboriginal and Torres Strait Islander identification field.

A [drug replacement purchase order](#) needs to be sent to Communicable Diseases Branch in January and July to receive medication.

<p>Facility to receive replacement medication (name from list of eligible Queensland Health facilities)</p>

INFORMATION FOR SEXUALLY TRANSMISSIBLE INFECTIONS (STIs) INCLUDED IN THE PROGRAM

Participating health services are provided with single dose treatment quantities of azithromycin, ceftriaxone and metronidazole to treat chlamydia, gonorrhoea and trichomoniasis free of charge to Aboriginal and Torres Strait Islander patients, their sexual partners, and/or patients at high-risk of not accessing treatment.

The program facilitates providing immediate and observed free treatment for eligible patients.

Diagnosis can be based on symptoms, sexual contact with individuals with an STI, and positive pathology results.

See <https://sti.guidelines.org.au> for further information on STI management and treatment.

Please complete this opt-in form and forward it to BBVCDU@health.qld.gov.au to enrol in the program.

A member of Communicable Diseases Branch will contact you to discuss your enrolment and approved maximum medication quantities.

Drug replacement purchase orders received in January and July are collated by Communicable Diseases Branch and medication dispatched by Central Pharmacy every six months around April/May and September/October.
