

QPDC 2019-2020 - Summary of Changes

Queensland Perinatal Data Collection (QPDC)

Summary of Changes

Please be advised that the following changes will be implemented in the Queensland Perinatal Data Collection for the 2019-2020 collection period to meet Department of Health, state and national reporting requirements.

Change Description	Reference Page/s
<p>1. Update of ICD-10-AM 10th edition to ICD-10-AM 11th edition</p> <p>The Independent Hospitals Pricing Authority engaged the Australian Consortium for Classification Development to conduct public consultation and develop the ICD-10-AM/ACHI/ACS Eleventh Edition for use in all Australian States and Territories for births occurring from 1 July 2019.</p>	3
<p>2. Add data quality and compliance statement to the Introduction</p> <p>A paragraph has been added to the Introduction advising hospitals that data reported to the Statistical Services Branch (SSB) must be of high quality and clarifying the process to manage data of poor quality.</p> <p>Note: Data containing high numbers of validation errors will not be accepted by SSB.</p>	3, 5
<p>3. Amend the Descriptions to add further clarity to the following Data Items:</p> <ul style="list-style-type: none"> • Last Menstrual Period estimation indicator • Estimated Date of Confinement estimation indicator • Mother's Date of Birth estimation indicator <p>Clarification that the indicator is to only be supplied as 'E' when any part of the date (the day, month or year) was intentionally estimated by a clinician. Systems should not default to 'E' in any circumstance.</p>	3, 28, 38
<p>4. Add new response value of 'declined to answer' to:</p> <ul style="list-style-type: none"> • Cigarette smoking during the first 20 weeks indicator • Cigarette smoking after 20 weeks indicator • Antenatal screening performed for illicit drug use indicator • Antenatal screening using Edinburgh Postnatal Depression Scale indicator • Amend validations to include new value of 3 <p>This change is required to assist in meeting the Australian Institute of Health and Welfare (AIHW) Compliance requirements to reduce the percentage of 'Not Stated/inadequately described' responses.</p>	4, 36, 37, 40, 41

Change Description	Reference Page/s
<p>5. Closure of the Antenatal Screening for Domestic Violence indicator and addition of new Antenatal Screening performed for Family Violence indicator</p> <p>This change is required to align with the revised <i>Clinical Practice Guidelines – Pregnancy Care</i>.</p> <p>The new Antenatal Screening performed for Family Violence indicator is to be used for births occurring from 1 July 2019.</p>	4, 39, 42
<p>6. Closure of Antenatal Screening for Alcohol Use and addition of new Alcohol items below:</p> <ul style="list-style-type: none"> • Alcohol consumption in the first 20 weeks of pregnancy indicator • Number of standard drinks consumed when drinking alcohol in the first 20 weeks of pregnancy • Alcohol consumption frequency in the first 20 weeks of pregnancy • Alcohol consumption after 20 weeks of pregnancy indicator • Number of standard drinks consumed when drinking alcohol after 20 weeks of pregnancy • Alcohol consumption frequency after 20 weeks of pregnancy <p>As part of the National Indigenous Reform Agreement (NIRA), the Council of Australian Governments (COAG) agreed to the enhancement of perinatal data to capture additional information in relation to antenatal care and alcohol use during pregnancy. COAG provided funding to the Australian Institute of Health and Welfare (AIHW) to facilitate the development of data items for inclusion in the Perinatal National Minimum Data Set through Schedule F of the NIRA. This data item has been modelled on the AUDIT-C tool which is already used in the Pregnancy Health Record.</p> <p>The new Alcohol items are to be used for births occurring from 1 July 2019.</p>	4, 39, 42, 43, 44
<p>7. Add the following new response values to Resuscitation Methods:</p> <ul style="list-style-type: none"> • 13 - CPAP ventilation • 14 - Intubation <p>The inclusion of these baby resuscitation methods will ensure that Queensland meets the national agreement to collect and provide high quality and nationally consistent data. This will assist in monitoring the incidence of resuscitation immediately after birth, perinatal outcomes of babies requiring resuscitation and the intensity of resuscitation required.</p> <p>The new resuscitation methods are to be used for births occurring from 1 July 2019.</p>	4, 82
<p>8. Update Terminology to conform to QHDD and METeOR</p> <p>Wording in the <i>2019-20 QPDC File Format</i> document has been updated to align with Queensland Health Data Dictionary (QHDD) terminology and the Australian Institute of Health and Welfare’s repository for national metadata standards (METeOR).</p>	Throughout document
