Trading Report for May	16

Executive Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

The Rockhampton Carpark has experienced effects from the Covid19 Pandemic with a reduction in revenue for the month of May. There has also been a significant increase in touchless payment with credit card transactions currently accounting for almost 90% of payments.

The GARS carpark was converted to a Fever Clinic for the month of May. This has increased usage in adjacent carparks and adversely effected carparking statistics. The Drive through Fever Clinic used a service road for entry and vehicles exited through the GARS carpark as a manual open passage. This has inflated the monthly statistics for 'manual open passage' by approximately 2500 passages.

Monthly Summary

The gross revenue for the reporting period was \$74,243 with occupancy being 12,168 paying vehicles using Short-Term transactions, 541 vehicles using Credit Card in and out and 6,557 staff using their Access Card to debit car parking fees. The revenue consists of \$49,347 income for vehicle transactions, \$24,896 for staff parking movements and long term passes \$70.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 10,433 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$32,351 for patients and visitors and \$41,892 for staff parking transactions.

The Covid19 restrictions has impacted on patient and visitor numbers and the carparks ability to generate revenue. The revenue for May 2020 was similar to May 2019 and is anticipated to increase with the reintroduction of more services in the hospital.

Equipment

The Skidata equipment was serviced by the local provider during May. There were no major faults found and all minor faults were rectified during the service. There were also two breakdowns being for a power supply and a speaker/coder error. The system lost connectivity to the server and was remotely restarted by Skidata.

Income Summary for Trading Period

Car Park income comparison whole of life (March 2019 to May2020)

Month	Vehicles	Income	Sales	Revenue	Cash	Credit Card

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 – Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Executive Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$79,192 with occupancy being 13,027 paying vehicles using Short-Term transactions, 534 vehicles using Credit Card in and out and 6,505 staff using their Access Card to debit car parking fees. The revenue consists of \$52,974 income for vehicle transactions, \$26,218 for staff parking movements and long term passes \$140.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 10,809 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$36,936 for patients and visitors and \$42,256 for staff parking transactions.

Annual Summary

The gross revenue for the 2019/20 financial year was \$979,041 with occupancy being 167,844 paying vehicles using Short-Term transactions, and 75,726 staff using their Access Card to debit car parking fees. The revenue consists of \$673,214 income for vehicle transactions, \$303,809 for staff parking movements.

Equipment

The Skidata system was upgraded to Windows10 on the 30th of June. This upgrade included the Skidata Servers, pay stations and remote login access. The carpark was available for use free of charge for 24 hours while the upgrades were carried out. An audit of the pay station floats was also carried out in conjunction with the upgrades. The machine reliability was good however there are 2 barcode scanners that are becoming unreliable and will require replacement when spare parts are available.

Income Summary for Trading Period

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 – Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Executive Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$89,833 with occupancy being 15,095 paying vehicles using Short-Term transactions, 517 vehicles using Credit Card in and out and 6,962 staff using their Access Card to debit car parking fees. The revenue consists of \$60,926 income for vehicle transactions, \$28,907 for staff parking movements and long term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 11,676 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$42,909 for patients and visitors and \$46,924 for staff parking transactions.

Equipment

The Skidata system was upgraded to Windows 10 on the 30th of June 2020. This upgrade included the Skidata Servers, pay stations and remote login access. There has been a significant increase in equipment issues since this upgrade. These issues include: -

- On grade Entry out of service
- MLC APM Note and Coin Floats offline
- MH APM Note and Coin Floats offline
- MH APM Coin Floats offline
- GARS Exit lost connection to ADVAM
- MH Entry out of service

All equipment is currently functioning normally, operational maintenance has been increased to detect and monitor potential defects within the carpark systems.

Income Summary for Trading Period

Car Park income comparison 2020 Calendar Year

Month	Vehicles	Income	Sales	Revenue	Cash	Credit Card
January	14,844	\$59,687	\$26,099	\$85,827	\$14,866	\$70,960

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 - Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Executive Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$86,759 with occupancy being 14,781 paying vehicles using Short-Term transactions, 525 vehicles using Credit Card in and out and 6,670 staff using their Access Card to debit car parking fees. The revenue consists of \$60,135 income for vehicle transactions, \$26,624 for staff parking movements and long term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 11,127 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$42,075 for patients and visitors and \$44,684 for staff parking transactions.

Equipment

All equipment is currently functioning normally, with minimal disruptions to service.

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 – Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$92,201 with occupancy being 15,660 paying vehicles using Short-Term transactions, 738 vehicles using Credit Card in and out and 7,073 staff using their Access Card to debit car parking fees. The revenue consists of \$63,859 income for vehicle transactions, \$28,342 for staff parking movements and long term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 11,737 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$44,777 for patients and visitors and \$47,424 for staff parking transactions.

Equipment

There have been connectivity issues with the Post Office entry for considerable time with Skidata unable to provide an effective solution. While most times the entry station loses and regains connection without any interruption to service. During September this issue started to interrupt services and the entry station required restarting to bring back online. Our local service provider attended site and cleared all physical components of issues and recommended that Skidata restart the processor for this station to clear the error. A request was lodged with Skidata who restarted the processor on the 02/10/2020 which has resolved the issue.

All other equipment has been operating normally.

A fault report from ADVAM was received by Revenue stating that entry stations were not downloading data to the ADVAM system, these stations were tested and no fault was found on our site.

Income Summary for Trading Period

Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$93,764 with occupancy being 16,067 paying vehicles using Short-Term transactions, 729 vehicles using Credit Card in and out and 6,961 staff using their Access Card to debit car parking fees. The revenue consists of \$64,966 income for vehicle transactions, \$28,798 for staff parking movements and long-term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 11,826 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$46,120 for patients and visitors and \$47,644 for staff parking transactions.

Equipment

Equipment has been operating normally except for the Post Office Entry which continues to have an issue. New components have been sent by Skidata to resolve the current issue with the Post Office Entry.

Income Summary for Trading Period

Car Park income comparison 2020 Calendar Year

Month	Vehicles	Income	Sales	Revenue	Cash	Credit Card

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 – Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$93,451 with occupancy being 16,182 paying vehicles using Short-Term transactions, 629 vehicles using Credit Card in and out and 7,021 staff using their Access Card to debit car parking fees. The revenue consists of \$65,791 income for vehicle transactions, \$27,660 for staff parking movements and long-term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 11,851 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$45,515 for patients and visitors and \$47,936 for staff parking transactions.

Equipment

Equipment has been operating normally.

Income Summary for Trading Period

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

${\tt P5-Rehabilitation~(Canning~Street)}\, car\, park$

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 - Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$91,555 with occupancy being 15,830 paying vehicles using Short-Term transactions, 640 vehicles using Credit Card in and out and 6,931 staff using their Access Card to debit car parking fees. The revenue consists of \$65,195 income for vehicle transactions, \$26,360 for staff parking movements and long-term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 11,459 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$46,040 for patients and visitors and \$46,356 for staff parking transactions.

Equipment

The GARS Carpark entry and exit stations were affected by an electrical storm in late December, which resulted in significant damage to the computer processing unit and associated printed circuit boards. Rectification work is currently being carried out.

Income Summary for Trading Period

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 - Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Skidata Reporting Template	

Car Park Reporting Requirements

The Capital and Asset Services has developed a monthly reporting template that is required to be completed and submitted by Rockhampton Hospital. The purpose of this document is to provide guidance on how Rockhampton Hospital car park can meet their monthly financial and activity reporting requirements through the Capital and Assets Services Operational Performance Dashboard. Monthly operational reports are to be provided in a separate word template.

The intention of this brief is to provide an outline to how the Skidata system views the customer versus staff relationship. This will provide the basis for the following options: -

- Modify the monthly report template to suit current reporting capabilities
- Purchase additional reporting capabilities from Skidata to enable completion of current reporting template
- Modify the current utilisation methodology of Skidata to provide a reporting framework more suitable to the reporting requirements

This brief will not provide recommendations however it will provide a basis for discussion to enable approved reporting to be completed for each month. This will also include a proposed template for Skidata to use for the purpose of quoting.

The reporting tools are intended to measure four metrics each month:

- 1. Occupancy
- 2. Attendance
- 3. Revenue
- 4. Expense

The monthly reports that are currently being submitted are a summary of the available reporting function and require the interrogation of the database to retrieve the information. The information required to complete the Capital and Asset Services monthly template is not currently available from the database. To achieve the completion of this monthly template would require the development by Skidata of a specialised reporting tool or the overhauling of the methodology of using the current database.

Glossary of Terms

Designation	Explanation
Parking with Revenue	Revenue from Short Term Parking Tickets, Credit Card Entry/Exit,
	concession payments and Staff who pay on Exit by credit card
Sales	Long term tickets, Lost Tickets and Contract Parker sales including
	the loading of credit on PCDC Staff cards
Credit Entries Issued	Transaction reversal after bank notes entered Automatic Pay
	Machine (APM) or APM cannot issue change
Credit Issues Redeemed	Credit redeemed in cash or through parking activity
Parking without Revenue	Exit during grace period, Free Concession, Free Contract Parker,
	Staff exiting using credit on PCDC
PCDC Staff Cards	Personalised Cash Debit Card (PCDC)
Contract Parker	Skidata customer management system that controls the
	carparking rates that are charged using a registered access card
Customer	A category of users that access a common service
User	A user within the Skidata System who access the carpark services
	through a registered access card
Article	The designated charge rate allocated to a registered customer
Counting - Short Term	The period a Short Term or Long-Term Ticket is in the Carpark
Counting - Contract	The period a Staff Member exiting on Credit Card, Concession
	Holder, Contract Parker or visitor Entering & Exiting using Credit
	Card is in the Carpark (Excludes debit from PCDC)
Day Concessions	A concession obtained by a Commonwealth Concession Card
Long Term Concession	A registered Concession Holder issued by a Hospital Ward
APM	Automatic Pay Machine
Control Centre	The control centre is a computerised view of system events and
	status with the ability to perform basic machine functions
SPT	Short Term Parking Ticket is created by Skidata when a vehicle
	driver entering a carpark presses for a ticket
LT	Lost Ticket is an exit pass created at an APM or exit
LPT	Long Term Parking Ticket is a SPT converted to a day or & Day pass
	at the APM
S4/HANA	SAP Finance System includes Cost Centre Reporting on Expenses
	and Revenue

Skidata System Operating Methodology

The Skidata system at Rockhampton Hospital operates under two main categories. These two categories are the Short-term Parking Ticket (SPT) and the Contract Parker.

SPT is designed for a member of the public to drive up to the entry gate and either press for a parking ticket or enter on a credit card. A SPT can be transferred at the APM to an LPT at the request of the user. The LPT provide multiple uses of the parking ticket for either the one day or 7 days. The driver then either pays for the parking ticket at the APM or using credit card at exit.

The SPT has two methods of payment which are cash at the pay station or credit cards at the pay stations or exits.

Contract Parker is designed to include all the registered customers/users for the car park. This includes: -

- Staff
- Concession holders
- Fleet Vehicles
- Delivery Vehicles
- Site Vehicles

The Contract Parker is a customer management system that controls the carparking rates that are charged when using a card registered in the Skidata system. There are several different rates that can be applied to registered cards through applying the correct parking article. The article is a predetermined fee rate that designates the type of parking activity e.g.- staff, long term concession, fleet vehicle etc.

The utilisation of existing staff access cards for parking activity has been achieved through nominating the cards as a Personalised Cash Debit Card (PCDC) in the Skidata system. This card has two functions, one is to designate the user as eligible for the relevant staff rate. The second is the card can also be used as a debit card and will pay any outstanding amount displayed at a pay station or exit station irrelevant of the staff rate. To operate as a debit card credit must first be loaded onto the card at an APM.

Metrics Measuring

Occupancy

Under the reporting tool framework the definition of occupancy states: -

Occupancy measures the **number of days** that the car park meets the definition of **'full capacity'**. This value is entered into the yellow square corresponding to the month of the report. The template will then calculate a percentage based on the following formula:

 $Percentage \ of \ days \ per \ month = \frac{Number \ of \ days \ at \ full \ capacity}{Number \ of \ days \ in \ a \ month} \times 100$

The Skidata system does not currently report on occupancy of car park during the day. The system does however have a live counter on the Control Centre. This counter is relatively inaccurate because of the integration of precursory processes into the paid parking system. Some of the issues include site vehicles driving around boom gates, Fleet vehicles pressing help button for exit, number plate recognition not recognising Fleet vehicles, concession holders not using passes correctly. While the overall percentage of incorrect use is low, it has a major impact on the percentage in smaller car parks. The counter can be reset out of hours after counting the number of vehicles, but there is no way of knowing whether the vehicles parked in the carparks when the count is completed have entered as SPT or Contract Parker.

Attendance

Under the reporting tool framework, the definition of Attendance states: -

Attendance totals are categorised in three ways:

- Staff
- Visitor
- Concession

Under the reporting requirements staff pass data is only required as a total value for the month whereas visitor and concession data are required against the time frames that they spend in the carpark. Staff are measured in two ways under the Skidata system: -

- Staff who load credit onto their staff card and debit their staff card when they leave the carpark
 - These staff show in reporting as PCDC, their parking transactions are displayed as parking transactions without revenue
 - They do not display in fee analysis and only appear as a total figure at the end of month report
- Staff who swipe their credit card on exit or pay for the current parking transaction at the APM are counted as parking transactions with revenue
 - These staff are not currently shown in reporting and the exact number of staff using this method is unknown. They are displayed in fee analysis and combined with registered paying concession users and visitors who enter and exit by credit card.

The Skidata system doesn't differentiate between visitors, staff who pay on exit and short-term concessions (pension card holders) for the purpose of revenue reporting with all categories shown as parking transaction with revenue.

A visitor is someone who enters by SPT or credit card, but this is only how the system views the vehicles while they are within the car park. A vehicle that enters as a Contract Parker can be reported as leaving the carpark as a SPT depending on the method of payment.

Currently the Skidata parking duration reporting method does not segregate staff, visitors and concession holders. For the purpose of duration reporting the Skidata system shows a combined SPT, LPT and Short-Term Concession Holders as Short-Term Counting. The Contract Counting combines all staff, credit card entry/exit, Fleet Vehicles, Delivery Vehicles and registered concession holders.

Revenue

The total revenue that the car park has earnt should align with S4/HANA reporting. The total revenue is generated from three sub-categories:

- Staff revenue
- Visitor revenue
- Concession revenue

The S4/HANA system does not report on car parking activities. It is solely a cost capture for credit card settlement and banking transactions. The cost centre report should be considered as accurate and the Skidata reporting as an operating guide. The Skidata fee group analysis and the total revenue report include gst so this will need to be considered when comparing to the cost centre report.

The fee group analysis (number of vehicles / rate) only shows vehicles with revenue which is displayed as Short Term and Contract. This displays the SPT and Short-Term Concession holders as Short Term Counting versus rate. The Contract Counting fee group analysis combines registered 50% concession holders, staff who pay on exit and credit card entry/exit users.

The summary of attendance for staff who use the PCDC debit method is available, but the breakdown between visitors, concessions and staff who pay on exit is not currently available.

Expenses

With the integration of SAP S4/HANA the cost centre reports have not currently been refined to allow a detailed expense flow. This is currently being reviewed to provide a more effective reflection of expenses in the car park.

The transition from the Defect Liability Period to normal operations will also enhance the flow of actual costings to the cost centre. Another improvement in costings will be the raising of purchase orders by car park administration staff to improve accuracy.

Conclusion

The conclusion of this brief is that an agreed template be sent to Skidata to obtain a quote for the service and reporting packages required to provide the information required to achieve reporting requirements.

A draft template has been created and is based on current reporting and future monthly requirements. The intent of this template is to ensure requirements quoted by Skidata comply with future reporting strategies.

Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$89,912 with occupancy being 15,281 paying vehicles using Short-Term transactions, 645 vehicles using Credit Card in and out and 6,422 staff using their Access Card to debit car parking fees. The revenue consists of \$63,196 income for vehicle transactions, \$26,716 for staff parking movements and long-term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 10,206 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$48,696 for patients and visitors and \$41,216 for staff parking transactions.

Equipment

All carparks are currently operational with some minor interruptions to service.

Income Summary for Trading Period

Car Park income comparison 2020/21 Financial Year

Month	Vehicles	Income	Sales	Revenue	Cash	Credit Card
July	15,095	\$60,926	\$28,907	\$89,833	\$10,801	\$79,031

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level car park has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

P5 - Rehabilitation (Canning Street) car park

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 - Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark

Summary

This report provides a statistical overview of the performance of the paid parking system within the Rockhampton Hospital. The data is provided by automatic equipment and should only be considered as a guide. All financial data provided by the Skidata system includes GST.

Monthly Summary

The gross revenue for the reporting period was \$97,803 with occupancy being 16,930 paying vehicles using Short-Term transactions, 695 vehicles using Credit Card in and out and 7,144 staff using their Access Card to debit car parking fees. The revenue consists of \$69,476 income for vehicle transactions, \$28,312 for staff parking movements and long-term passes.

The Skidata system treats staff who pay per exit as a paying vehicle and only recognises money deducted from an access card as staff. While the information is not available from the system it is estimated that approximately 12,063 staff per month are parking within the Paid Parking system. Therefore, the more realistic breakdown would be \$49,155 for patients and visitors and \$48,648 for staff parking transactions.

Equipment

All carparks are currently operational.

Income Summary for Trading Period

Car Park income comparison 2020/21 Financial Year

Month	Vehicles	Income	Sales	Revenue	Cash	Credit Card
July	15,095	\$60,926	\$28,907	\$89,833	\$10,801	\$79,031

Rockhampton Hospital Parking Details

Car park locations

P1 - Multi-level car park

The multi-level carpark has space for 520 cars, 25 motorbikes and 20 cyclists. There are disabled parks and pram parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P2 - On-grade car park

In front of the multi-level car park, the on-grade car park at ground level has spaces for 58 cars. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P3 - Post office / Oral health car park

Behind the post office on North Street and beside the Oral Health building there are 18 spaces for car parking. Pay stations are located at the ground level pedestrian entrance to the multi-level car park and the main hospital entrance (front foyer).

P4 - Cancer care (Canning Street) car park

Cancer care parking is available off Canning Street and has 18 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services (GARS).

${\tt P5-Rehabilitation~(Canning~Street)}\, car\, park$

Geriatric and Rehabilitation Services parking is available off Canning Street and has 38 parks available. The closest pay station can be found at the entrance of Geriatric and Rehabilitation Services.

P6 - Mental Health car park (Quarry Street)

Mental Health parking is available off Quarry Street and has 88 parks available. The closest pay station can be found at the entrance of the Mental Health Carpark
