

Electronic Validation Application (EVA Plus) Validations - Morbidity

September 2025

Electronic Validation Application (EVA Plus) is a web-based application developed by the Statistical Services Branch (SSB) that enables facilities to view and action validation queries that are generated from the submitted data provided by facilities – such as the Queensland Hospital Admitted Patient Data collection (QHAPDC).

There are 4 user security (access) levels in EVA Plus.

Primary or Deputy Users have the ability to create and edit users for their designated facilities.

Upon logging into EVA Plus, a summarised display will be visible which indicates for your facility the amount of validations to address and in what month they are outstanding. Some users are responsible for multiple facilities so one or several facilities may be visible.

Facility Name	Older	Sep 24	Oct 24	Nov 24	Dec 24	Jan 25	Feb 25	Mar 25	Apr 25	May 25	Jun 25	Jul 25	Aug 25	Total
HOSPITAL			1		1		1	5	4	9	3			29
HOSPITAL											1	3		3
HOSPITAL											1	2		3
											1	2		2
											1			1
AL												1		1
HOSPITAL												1		1

*Facilities displayed on this screen are not visible for confidentiality purposes.

The colours of the outstanding validations indicate:

Red: these validations are overdue and require immediate action

Orange: relate to validations for the previous months data extraction

Grey: relate to validations for the most recent data extract.

This screen will display when the validations for your facility are selected. The validations that appear will show at patient and episode level, with the validation message for each episode and the status of the validation.

Status	Fcilty ID	Patient ID	Episode ID	Fcilty Unique ID	Start Date	End Date	Msg Type	Msg Category	Msg Code	Msg Description	Latest Action Text
Not Actioned							WRN	-	H883	The Smoking status has been reported as 2 Not a smoker or 9 Not reported, but the morbidity coding includes Z720.	-
Not Actioned							FTL	NLI	H152	The combination of suburb, postcode and state is invalid. The address is: Postcode: 4165, State: 4, Suburb: REDLANDBAY	-
Not Actioned							FTL	GEN	H532	The standard ward code provided is invalid as at 30-AUG-2023 09:00. Please check code	-
Not Actioned							FTL	GEN	H532	The standard ward code provided is invalid as at 28-AUG-2023 09:00. Please check code.	-
Not Actioned							FTL	GEN	H532	The standard ward code provided is invalid as at Admission. Please check code.	-
Not Actioned							WRN	-	H683	The Smoking status has been reported as 2 Not a smoker or 9 Not reported, but the morbidity coding includes Z720.	-

**Some details on this screen are not visible for confidentiality purposes.*

There are five different EVA Status categories. These are shown in the “Status” column:

Actioned Indicates that the record has been actioned by facility.

Facility Indicates the Facility needs to relook at the record as a HSB user has provided a response back to the facility.

Not Actioned Indicates that the record has not yet been actioned by the facility.

HSB Indicates the record has been sent to QHAPDC for actioning.

HSBQ Indicates the record has been sent to the Data Quality Team for actioning.

Selecting “Edit” enables you to open each validation individually.

The screenshot displays a validation interface. At the top left, there is a dropdown menu labeled 'Hospital Action' with the selected option 'Record confirmed as correct - please map error'. Below this is a text area labeled 'Action Text*' containing the text: 'Patient admitted for bacillary shigellosis. Confirmed by pathology and clinical notes.' To the right of the text area are two tabs: 'Current Values' and 'History'. The 'Current Values' tab is active, showing a list of fields and their values:

Patient ID	
Episode ID	
Facility Unique ID	
Start Date	
End Date	
Facility	
Message ID	
Message Date	
Message Type	FTL
Active Flag	Y
Message Code	H559
Message	Code OD A038 is a rare code. Please confirm.
Hospital Action	
Action Text	-
Hospital Audit User	-
Hospital Audit Date	-
HSB Action	
HSB Action Text	-
HSB Audit User	-
HSB Audit Date	-

**Some details on this screen are not visible for confidentiality purposes.*

The “Hospital Action” drop down menu will determine the facility response to the validation. The facility can choose:

- Record updated by Facility
- Record confirmed as correct – please map error
- Facility to contact HSB.

“Action Text” is a free text field where facilities type their response to the validation query.

Validation Responses

When actioning validations a detailed response should be supplied in the “Action Text” field. This informs SSB of the investigation undertaken by the facility and steps required to resolve the validation or confirm the source data.

The validation responses should demonstrate a data quality review has occurred and cite the source of the data. The sources can include:

- Medical record forms
- Australian Coding Standards (ACS) or National Coding Advice (NCA)
- Pathology/test results
- Documentation by a clinician.

Validation responses should provide detailed information on confirmation of the data or how the data has been amended following a review.

EVA validation responses and examples of appropriate responses:

- | | |
|---|---|
| ✗ <i>"Data amended"</i> | ✓ <i>"Data has been amended to (insert relevant correction) as per supporting clinical documentation"</i> . |
| ✗ <i>"Coding correct"</i> | ✓ <i>"Coding confirmed correct as per ACS and supporting clinical documentation (insert documentation source)"</i> . |
| ✗ <i>"Elective status confirmed"</i> | ✓ <i>"Elective status confirmed correct as per clinical documentation"</i> |
| ✗ <i>"Medicare eligibility confirmed"</i> | ✓ <i>"Medicare eligibility confirmed and country of birth amended to (insert correction) as per clinical documentation"</i> |
