**Before vaccinating:**

- **ALWAYS** review the Australian Immunisation Register (AIR) to check the patient’s previous immunisation history.
- Check the online Australian Immunisation Handbook (the Handbook) or download the Handbook app for information about catch-up vaccination, timing of vaccination for special risk groups at immunisationhandbook.health.gov.au/
- Check the correct vaccine dose number has been recorded and report all vaccinations to AIR as soon as possible.

**People diagnosed with medical risk factors:**

- At diagnosis
  - Pneumococcal
    - Prevenar 13
    - Dose of Pneumovax 23 2–12 months after that and then a second dose of Pneumovax 23 at least 5 years after the previous dose (see Handbook)
  - Pneumococcal
    - Prevenar 13
    - Dose of Pneumovax 23 2–12 months after that and then a second dose of Pneumovax 23 at least 5 years after the previous dose (see Handbook)

- Additional dose 2–12 months later
  - Pneumococcal
    - Prevenar 13
  - Pneumococcal
    - Prevenar 13

- Additional dose 5+ years later
  - Pneumococcal
    - Prevenar 13

**Seasonal influenza vaccination**

Eligible groups (refer to the Handbook for further information):
- All children aged 6 months to less than 5 years
- All Aboriginal and Torres Strait Islander people aged 6 months and older
- All pregnant women at any stage of pregnancy
- Individuals with medical conditions predisposing them to severe influenza
- All individuals aged 65 years and older.

---

Note: Refugees and other humanitarian entrants aged 20 years and older with no documented history of vaccination are eligible for the following vaccinations:
- diphtheria-tetanus-pertussis, chickenpox, poliomyelitis, measles-mumps-rubella and hepatitis B.

Refer to the Handbook for number and timing of doses.
