</tbody>
</table>

(a) "Infants" refers to new births recorded by the Newborn Screening Section. Please note this includes stillborn babies.
(b) "Cases" refers to confirmed cases notified to the Newborn Screening Section
(c) Cases per 10,000 infants.
(d) MCAD: Medium-chain acyl-CoA dehydrogenase deficiency (from 1/4/2004)
(e) Other EMS: Other disorders of amino acid, organic acid and fatty acid metabolism detected by Tandem Mass Spectrometry (from 1/4/2004)

The above information has been provided to the Data Services Unit by the Newborn Screening Section for use in this publication. Newborn Screening data has been included in response to clinician request. Differences in birth figures between these data and the Perinatal Data Collection are a result of different collection methodologies. Appreciation is extended to the Newborn Screening Section for their assistance. It should be noted that the Perinatal Data Collection does not capture newborn screening data - and therefore cannot provide any further information regarding this table. Interested parties may contact the Newborn Screening Section in the following manner:
