The PA Foundation raises funds for world-class health and medical research conducted at the Princess Alexandra Hospital Campus for better health outcomes, treatment, prevention and cure of disease.

We award grants to established or new researchers, new appointees, nurses and allied health workers.

The level of research projects funded depends entirely upon the level of philanthropic funds raised. The more money we raise, the more research we fund.

So help us support health research by supporting our fundraising activities.

Every donation makes a difference - right here on the hospital campus

For more information on research grants and fundraising activities, call us on 07 3240 2359 or visit www.pafoundation.org.au
