

Release Notes: RTI 2096 – In-hospital falls resulting in injury

Data request from applicant

- a) Data in respect of each public hospital in Queensland for the most recent financial year available i.e. 2012/2013 – In-hospital falls resulting in injury.

Data source

- The data used for the calculation of in-hospital falls resulting in patient injury is the Queensland Hospital Admitted Patient Data Collection.

Calculation of In-hospital falls resulting in injury

- The data extracted calculates the rate of Hospital acquired (not present on admission) falls resulting in injury per 10,000 patient days.
- The denominator is the number of patient days for all admitted patients.
- The numerator is the number of In-hospital falls resulting in any types of injury requiring an increase in clinical care or monitoring. These falls resulting in injury are identified as in Appendix A.
- Rate of separations resulting in any types of injury per 10,000 patient days is calculated as

$$\frac{\text{Number of separations of in-hospital falls resulting in any type of injury}}{\text{Number of patient days}} \times 10000$$

Caveats on data extracted

- Differences between hospitals in regards to coding, admission and discharge practices could contribute to differences observed.
- The number of separations resulting in injuries alone should not be used to make any assumption to assess hospitals, as hospitals have a varied number of patient admissions – therefore the rate per 10000 patient days is provided.
- The data provided in this report is presented as an information source only and may be subject to change.
- Given the statewide rate is so low, care should be taken when interpreting data for smaller facilities with a lower number of patient days i.e. those with approximately 10,000 patient days. Each fall impacts on the rate significantly of the smaller hospitals.
- Cells with very small counts (<5) may potentially result in an individual being identified. Consequently, all cells with a value ranging between 1-4 in-hospital falls resulting in injury have the value "<5". Given the lower number of falls, rates for these hospitals have not been calculated.

Date extracted

9 December 2013

2012-13 Queensland public hospital - In-hospital falls resulting in patient injury - results

The below table presents the number of in-hospital falls resulting in injury, total number of patient days and the rate per 10,000 patient days for each hospital for 2012-13.

Statewide, Queensland has a rate of 6.6 in-hospital falls resulting in injury per 10,000 patient days. The majority of these injuries, 89% were non-fracture type injuries.

Table 1 In-hospital falls resulting in injury by Hospital for 2012/13

RTI Release

Appendix A

In-hospital falls resulting in injury is defined using the following ICD-10-AM codes:

- Falls as an external cause of injury(See table 2)
- Condition onset flag = 2 (condition arising during the episode of care)
- Place of occurrence = Y92.22 (in a health service area)
- Injury (See table 3)

Table 2 List of ICD codes for falls

ICD_CODE	ICD descriptions
W010	Fall on same level from slipping
W011	Fall on same level from tripping
W012	Fall on same level from stumbling
W027	Fall involving baby carriage
W028	Fall involving other and unspecified pedestrian conveyance
W03	Other fall on same level due to collision with, or pushing by, another person
W04	Fall while being carried or supported by other persons
W05	Fall involving wheelchair
W061	Fall involving special purpose bed
W066	Fall involving conventional bed
W068	Fall involving other specified bed
W069	Fall involving unspecified bed
W070	Fall involving rocking chair
W071	Fall involving folding chair
W072	Fall involving revolving chair
W073	Fall involving stool
W075	Fall involving bath chair
W076	Fall involving commode chair
W077	Fall involving lift assistance chair
W078	Fall involving other specified chair
W079	Fall involving unspecified chair
W082	Fall involving table
W088	Fall involving table
W089	Fall involving unspecified furniture
W100	Fall on and from escalator
W101	Fall on and from travelator
W102	Fall on and from ramp
W109	Fall on and from other and unspecified stairs and steps
W130	Fall from or through balcony or verandah
W131	Fall out of or through window
W132	Fall out of or through glass door
W133	Fall from roof
W134	Fall through roof
W135	Fall from or through floor
W138	Fall from, out of or through other specified building or structure
W139	Fall from, out of or through unspecified building or structure
W170	Fall into hole
W171	Fall into quarry
W172	Fall into storm drain
W173	Fall into shaft

ICD_CODE	ICD descriptions
W174	Fall into empty swimming-pool
W178	Other specified fall from one level to another
W179	Unspecified fall from one level to another
W180	Fall from bumping against object
W181	Fall from or off toilet
W182	Fall in or into bath-tub or shower
W188	Other specified fall on same level
W189	Unspecified fall on same level
W19	Unspecified fall

Table 3 List of ICD codes for injuries

ICD_CODE	ICD descriptions
S00-S09	Injuries to the head
S10-S19	Injuries to the neck
S20-S29	Injuries to the thorax
S30-S39	Injuries to the abdomen, lower back, lumbar spine and pelvis
S40-S49	Injuries to the shoulder and upper arm
S50-S59	Injuries to the elbow and forearm
S60-S69	Injuries to the wrist and hand
S70-S79	Injuries to the hip and thigh
S80-S89	Injuries to the knee and lower leg
S90-S99	Injuries to the ankle and foot
T00	Superficial injuries involving multiple body regions
T01	Open wounds involving multiple body regions
T03	Dislocations, sprains and strains involving multiple body regions
T04	Crushing injuries involving multiple body regions
T05	Traumatic amputations involving multiple body regions
T06	Other injuries involving multiple body regions, not elsewhere classified
T07	Unspecified multiple injuries
T08	Fracture of spine, level unspecified
T09	Other injuries of spine and trunk, level unspecified
T10	Fracture of upper limb, level unspecified
T11	Other injuries of upper limb, level unspecified
T12	Fracture of lower limb, level unspecified
T13	Other injuries of lower limb, level unspecified
T14	Injury of unspecified body region

Release Notes: RTI 2096 – Hospital Acquired 3rd or 4th Stage Pressure Injuries

Data request from applicant

- a) Data in respect of each public hospital in Queensland for the most recent financial year available i.e. 2012/2013 – Hospital Acquired 3rd or 4th Stage Pressure Injuries.

Data source

- o The data used for the calculation of Hospital Acquired 3rd or 4th Stage Pressure Injuries is the Queensland Hospital Admitted Patient Data Collection.

Calculation of Hospital Acquired 3rd and 4th Stage Pressure Injuries

- o The data extracted calculates the rate of Hospital Acquired (not present on admission) 3rd and 4th Stage Pressure Injuries per 10,000 patient days.
- o The denominator is the number of patient days for all admitted patients.
- o The numerator is the number of Hospital Acquired 3rd or 4th Stage Pressure Injuries. These pressure injuries are identified as condition not present on admission having diagnosis of Stage III or Stage IV decubitus ulcer and pressure area (L89.2 or L89.3).

$$\frac{\text{Number of Hospital Acquired 3}^{\text{rd}} \text{ or 4}^{\text{th}} \text{ Stage Pressure Injuries} \times 10000}{\text{Number of patient days}}$$

Caveats on data extracted

- o Differences between hospitals in regards to coding, admission and discharge practices could contribute to differences observed.
- o The number of pressure injuries alone should not be used to make any assumption to assess hospitals, as hospitals have a varied number of patient admissions – therefore the rate per 10000 patient days is provided.
- o The data provided in this report is presented as an information source only and may be subject to change.
- o Given the statewide rate is so low, care should be taken when interpreting data for all facilities. Each pressure injury impacts on the rate significantly.
- o Cells with very small counts (<5) may potentially result in an individual being identified. Consequently, all cells with a value ranging between 1-4 3rd or 4th stage pressure injuries have the value "<5". Given the lower number of pressure injuries, rates for these hospitals have not been calculated.

RTI 2096 Terms of application: The following data in respect of each public hospital in Queensland for the most recent financial year available (e.g. 2012 - 2013) - percentage unplanned return to theatre.

Response: Queensland Health has implemented the Operating Room Management Information System (ORMIS) version 7 into Queensland public hospitals over the last few years. There is a data field in ORMIS v7 that indicates whether the operation was an unplanned return to theatre, from which this response has been derived.

It should be noted that ORMIS v7 has functionality that allows variation in the local configuration of the application - either to prompt the user that a new booking matches a medical record number of a patient with a previous procedure, or to disable this prompt. Furthermore, if the prompt is enabled, the user can set the time parameter for the number of days from the initial procedure, up to 3 days. Because of the variation in the functionality of the prompt, and the time parameter for the prompt, there is expected to be variation in the instances of unplanned returns being reported between hospitals.

Because ORMIS v7 was implemented on a rolling schedule, not all hospitals have information available for the full 2012-13 year. The table below show the unplanned returns to theatre and the date from which 2012-13 data are available.

Percentage of unplanned returns to theatre, Queensland public hospitals with ORMIS v7, 2012-13

Hospital	% Unplanned Theatre Returns	Start Date
Bundaberg Hospital	0.56%	01/07/2012
Cairns Hospital	0.29%	26/11/2012
Caloundra Health Service	0.00%	02/10/2012
Dalby Hospital	0.00%	05/12/2012
Emerald Hospital	0.51%	31/08/2012
Gladstone Hospital	0.09%	26/09/2012
Gold Coast Hospital	0.23%	01/06/2013
Gympie Hospital	0.17%	11/12/2012
Hervey Bay Hospital	0.89%	01/07/2012
Ipswich Hospital	0.24%	13/05/2013
Kingaroy Hospital	0.00%	30/10/2012
Mackay Base Hospital	0.29%	02/07/2012
Maryborough Hospital	0.00%	01/07/2012
Nambour General Hospital	0.49%	06/08/2012
Queen Elizabeth II Jubilee Hospital	0.21%	17/09/2012
Robina Hospital	0.20%	01/06/2013
Rockhampton Base Hospital	0.35%	03/09/2012
Royal Brisbane and Women's	0.35%	15/04/2013
Royal Children's Hospital	0.43%	01/07/2012
Toowoomba Hospital	0.88%	19/11/2012
Warwick Hospital	0.00%	01/07/2012
Total	0.40%	

Data Source: ORMIS v7

- Figures are derived from non-cancelled operations that were performed in the 2012-13 financial year.
- Not all facilities listed have used ORMIS 7 for the scoped financial year
- Percentages are calculated with a numerator of the number of unplanned cases and a denominator of the total number of operations.

Release Notes: RTI2096 – Hospital Standardised Mortality Ratio - HSMR

Data request from applicant

- a) Data in respect of each public hospital in Queensland for the most recent financial year available – Hospital Standardised Mortality Ratio.

Data source

- The data used for the calculation of the HSMRs is the Queensland Hospital Admitted Patient Data Collection and the National Admitted Patient Data Collection.
- The observed values are from the Queensland Hospital Admitted Patient Data Collection
- The expected values are based on the Queensland Hospital Admitted Patient Data Collection and National Admitted Patient Data Collection to enable benchmarking to the National average.

Data extracted

- The HSMR indicator definition is the latest definition from the Australian Commission on Safety and Quality in Health Care obtained in June 2013.
- HSMR is the ratio of observed number of deaths, to the expected number of deaths based on the characteristics of the patients, for hospital separations with diagnosis accounting for 80% of in-hospital mortality.
- Episodes of care that satisfy the following criteria are included in the calculation of the HSMRs:
 - Episodes of care in Queensland public and private hospitals
 - Separations with high-risk diagnosis, accounting for 80% of in-hospital deaths, a list of principal diagnosis is included at the end of this document
 - Age at date of admission: 29 days to 120 years
 - Hospital service care type:
 - Acute care
 - Geriatric Evaluation and Management
 - Maintenance
 - Sex: male, female
 - Length of stay: 1-365 days
 - Admission urgency status:
 - Emergency admission
 - Elective admission

Calculation of expected deaths

- The probability of death for each episode of care is calculated using a logistic regression model. The sum of the probability of death for the episodes of care gives the expected number of deaths.
- The outcome being modelled with the Logistic Regression model is if the mode of separation for the episode of care was died in hospital. The independent variables in the model are: age, sex, principal diagnosis, admission urgency status, length of stay, if admitted patient transferred from another hospital and Charlson index

Calculation of the HSMR

$$HSMR = \frac{\text{count_of_Observed_death}}{\text{sum_of_Probability_of_death}} \times 100$$

Note: the HSMRs are only produced when a facility has a quarter with more than 30 separations and at least 3 expected deaths.

Interpretation of HSMRs

The value of the HSMR and the confidence level must be interpreted together.

Value of HSMR

The value of the HSMR indicates if the hospital's mortality rate is lower, the same or higher than the expected rate (the state rate).

HSMR = 100 - no difference between hospital's mortality rate and the expected rate

HSMR > 100 - hospital's mortality rate is higher than the expected rate

HSMR <100 - hospital's mortality rate is lower than the expected rate

Confidence interval of HSMR

- The confidence interval indicates if the HSMR result is statistically significant i.e. if the hospital is truly different to the expected rate.
- The confidence intervals describe the precision of the HSMR estimate.
- Smaller hospitals with fewer in scope cases have wider confidence intervals representing less precise HSMR estimates.
- The result is considered to be statistically different to the expected if the confidence interval doesn't include 100.

Caveats on data extracted

- The Hospital Standardised Mortality Ratio (HSMR) is an indicator of healthcare quality that measures whether the death rate at a hospital is higher or lower than you would expect.
- Like all statistics, HSMRs are not perfect. If a hospital has a high HSMR, it cannot be said for certain that this reflects failings in the care provided by the hospital. A hospital may have a high ratio due to chance or they may have had a group of patients that were more complex than expected based on the calculated probabilities of death.

Date extracted

12 September 2013

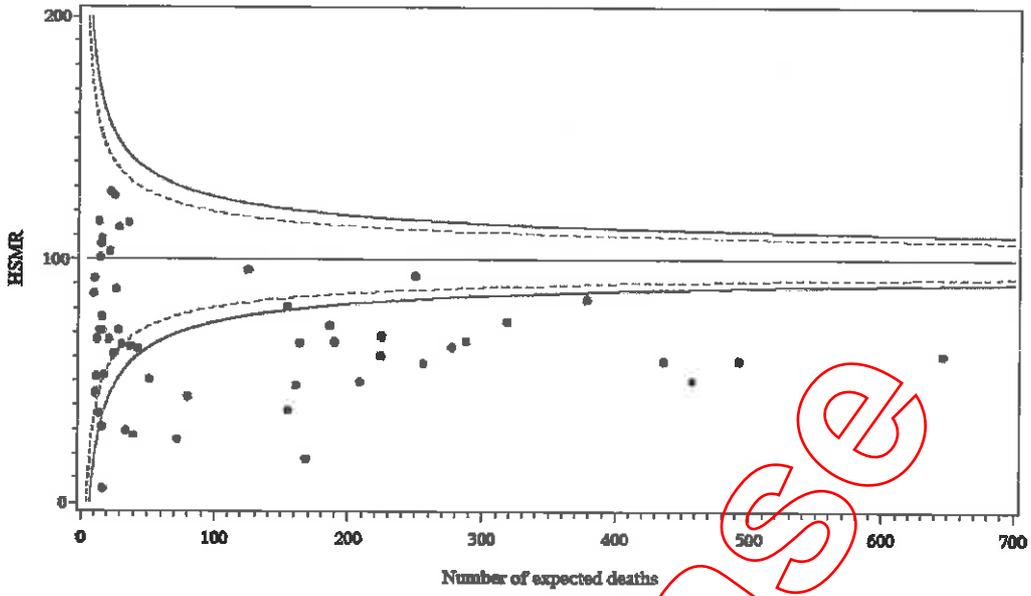

Additional Context

- Queensland Health has monitored the Hospital Standardised Mortality Ratios for the last couple of years.
- Where Hospitals have had a higher mortality rate, they have been required to investigate and rectify any issues.
- As a result the overall hospital mortality rate for Queensland has decreased over the last couple of years.

2012-13 Queensland public hospital HSMRs

- The below graph presents the HSMR results of Queensland public hospitals for the 2012-13 period by the number of expected deaths.
- As presented in the below graph, all Queensland hospitals are within both the 95% and 99% upper control limits, indicating that no Queensland hospital has an annual HSMR value that is statistically significantly higher than the Australian average.
- There are some hospitals that have a HSMR that is higher than 100, but these results are not statistically significant.

All hospitals, period=2012/2013

RTI Release

2012-13 Queensland public hospital HSMRs - results

- The below table presents for each hospital the HSMR value, observed number of deaths, expected number of deaths and number of separations for each hospital.
- Results that are highlighted blue indicate the hospital has an HSMR value which is in line with expected (based on the 95% confidence interval)
- Results that are highlighted green indicate the hospital has a lower HSMR value than expected (based on the 95% confidence interval)
- There are no hospital results that are highlighted as being higher than expected (based on the 95% confidence interval)

RTI Released

Release Notes: RTI 2096 – AMI, Knee Replacement and Hip Replacement Readmissions

Data request from applicant

- a) Data in respect of each public hospital in Queensland for the most recent financial year available i.e. 2012/2013 – Acute Myocardial Infarction (Table 1), Knee Replacement (Table 2) and Hip Replacement Readmissions (Table 3).

Data source

- The data used for the calculation of AMI, Knee Replacement and Hip Replacement Readmissions is the Queensland Hospital Admitted Patient Data Collection.

Definition

- The definition for these indicators is from the VLAD indicator definition. The indicator definition consists of Outcome (Numerator), Inclusion/exclusion criteria (Denominator) and Risk Adjustment Criteria. See attached document.

Calculation of Rates

- The Rate of Readmissions, un-risk adjusted rate, is calculated using the following formulae:

$$\text{Unrisk_adjusted_rate} = \frac{\text{Actual_number_of_readmissions}}{\text{Number_of_separations}} \times 100$$

- The Risk Adjusted Rate of Readmissions is the rate that the facility is expected to have if the patients of this facility has the same risk/severity criteria as the patients in QLD public facilities. Risk adjusted rates are only calculated for AMI and Hip Readmissions as for Knee readmissions risk adjustment was not relevant. The risk adjusted rates were calculated using the following formulae:

$$\text{Risk_adjusted_rate} = \frac{\text{Actual_number_of_readmissions}}{\text{Expected_number_of_readmissions}} \times \text{Rate_QLD_public_facilities} \times 100$$

Rate of Queensland Public Facilities – 2012/13			
Indicators	Total Number of Readmissions	Total Number of Patients	Rate of Readmissions
AMI Readmission	1,037	8,088	12.8
Hip Readmission	96	1,363	7.0

- Expected number of readmissions is the number of readmissions that the facility would expect to have if their patients has the same risk level as the patients from the QLD public facilities. The risk adjustment is calculated from the Logistic Regression based on the previous 12 months of the patient's separation date. See indicator definition for the list of risk adjustment co-morbidities used in risk adjustment.

- For definition of Total Number of Readmissions, see the criteria under “Outcome (Numerator)” of the indicator definition.
- For definition of Total Number of Patients, see the criteria under “Inclusion and Exclusion Criteria (Denominator)” of the indicator definition.

Interpretation of results

- If the confidence interval of the facility overlaps the rate of total QLD public facilities, then there is a no statistically significant difference.
- If the confidence interval of the facility doesn't overlap the rate of total QLD public facilities, then there is statistically significant difference.
 - Results that are highlighted green indicate the hospital has a LOWER readmission rate than expected (based on the 95%)
 - Results that are highlighted amber indicate the hospital has a HIGHER readmission rate than expected (based on the 95%)
 - Results that are NOT highlighted indicate that there is no statistically significant difference between hospital readmission rate and the expected (based on the 95%)
- No results were statistically higher or lower at the 99% confidence interval

Caveats on data extracted

- Differences between hospitals in regards to coding, admission and discharge practices could contribute to differences observed.
- For some facilities the number of readmissions and total number of patients are small, it should be interpreted with caution
- The number of readmissions alone should not be used to make any assumption to assess hospitals, as hospitals have a varied number of patient admissions
- The data provided in this report is presented as an information source only and may be subject to change.

Additional context

- Queensland hospitals currently monitor readmission rates monthly through the Variable Life Adjusted Display (VLAD) methodology.
- If a hospital has a high readmission rate compared to the state the hospital is required to investigate this further to determine the cause.
- The investigation is clinically reviewed and acted upon where necessary.

Date extracted

11 November 2013

2012-13 Queensland public hospital - AMI, Knee Replacement and Hip Replacement Readmissions - results

The below tables 1, 2 and 3 presents the AMI, Knee Replacement and Hip Replacement Readmissions expected number of readmissions, actual number of readmissions and the risk adjusted rate(%) for each hospital with 95% and 99% confidence intervals. There is no risk adjustment criteria for Knee Replacement readmission, the rate of this indicator is not risk adjusted. Only facilities with more than 30 separations are included in these tables.

RTI Release

Table 1 VLAD Acute Myocardial Infarction (AMI) Readmission Indicator Definition

Outcome (Numerator)	
Outcome	<p>AMI patients readmitted to any Queensland hospital within a specified interval since discharge to home / usual residence for a condition that could be considered a consequence of the diagnosis. See Appendix A for relevant ICD codes and readmission intervals.</p> <p>Readmissions were identified using probabilistic matching to allow inclusion of readmissions to a different facility as well as readmissions to the same facility. Episodes were matched using patient name (first name, surname and phonetic version of surname), date of birth, address (street, suburb and postcode), age and sex. Matches required at least four of the eight variables matching including either date of birth, first or second name. Potential matches were checked manually. Readmissions could not be transfers in.</p>
Inclusion and Exclusion Criteria (Denominator)	
Principal Diagnoses Code	<p>I21 (Acute myocardial infarction) For continuum of care:</p> <ul style="list-style-type: none"> • If the patient is admitted with principal diagnosis (PD) of Chest Pain/Angina and then transferred to another hospital with PD of AMI then the episode of care of Chest Pain/Angina as well as the episode of care with PD of AMI will be included in the VLAD chart. This is to avoid excluding episodes where the AMI diagnosis has not yet been determined. • If the patient is admitted with PD of AMI and then transferred to another hospital with PD of Chest Pain or Angina then this whole continuum of care is excluded from the definition. This is to avoid including patients who admitted due to Chest Pain or Angina but incorrectly diagnosis as AMI in the index hospital.
Episode type	Acute
Age	All ages
Length of stay	All patient days
Elective Status of patient	Emergency admission only
Admission source/referral source	All Admission Sources
Separation mode	<p>The following mode of separation in the last episode of care are included:</p> <ul style="list-style-type: none"> • Patient discharge to home/usual residence, • Correctional facility • Residential Aged Care Service
Rules applied when patients are transferred to other hospitals	<p>A transferred case is defined as either:</p> <ul style="list-style-type: none"> • an admission to a subsequent hospital within 12 hours of separation from the previous hospital OR • an admission to a subsequent hospital within 36 hours with indication of either a 'transfer out' or a 'transfer in' <p>Inclusion of patients/Denominator: Include in the hospital where the initial admission occurred and all hospitals with subsequent admissions, where transfers have occurred, and where the patient met the principal diagnosis codes above.</p> <p>Outcome/Numerator: If an adverse event (in-hospital mortality, long stay, readmission) occurs, the adverse event will be included in all hospitals where the patient had been admitted to in that continuum of care.</p>
State of Usual of residence	Queensland
Risk Adjustment Criteria	
Selected co-morbidities	Age Group, Heart Failure, Renal disease

Table 2 VLAD Hip Replacement Readmission Indicator Definition

Outcome (Numerator)	
Outcome	<p>Hip Replacement patients readmitted to any Queensland hospital within a specified interval since discharge to home / usual residence for a condition that could be considered a consequence of the procedure. See Appendix B for relevant ICD codes and readmission intervals.</p> <p>Readmissions were identified using probabilistic matching to allow inclusion of readmissions to a different facility as well as readmissions to the same facility. Episodes were matched using patient name (first name, surname and phonetic version of surname), date of birth, address (street, suburb and postcode), age and sex. Matches required at least four of the eight variables matching including either date of birth, first or second name. Potential matches were checked manually. Readmissions could not be transfers in.</p>
Inclusion and Exclusion Criteria (Denominator)	
Principal Diagnoses Code	<p>Any except the following:</p> <ul style="list-style-type: none"> • S72.0: Fracture of neck of femur • S72.1: Pertrochanteric fracture • S72.2: Subtrochanteric fracture
Procedure Codes	<p>At least one of the following procedure codes:</p> <ul style="list-style-type: none"> • 49318-00: Total arthroplasty of hip, unilateral • 49319-00: Total arthroplasty of hip, bilateral
Episode type	All
Elective status	All
Elective status of Readmission	All
Age	All ages
Length of stay	All
Admission source	All
Separation mode	All
Rules applied when patients are transferred to other hospitals	<p>A transferred case is defined as either:</p> <ul style="list-style-type: none"> • an admission to a subsequent hospital within 12 hours of separation from the previous hospital, OR • an admission to a subsequent hospital within 36 hours with indication of either a 'transfer out' or a 'transfer in'. <p><u>Inclusion of patients/Denominator:</u> Include in the hospital where the procedure was performed and all hospitals with subsequent admissions where transfers have occurred.</p> <p><u>Outcome/Numerator:</u> If the patient was readmitted then the readmission will be included in all hospitals where the patient had been admitted to in that continuum of care.</p>
State of usual residence	Queensland
Risk Adjustment Criteria	
Selected co-morbidities	Emergency patient either by elective status or emergency modifier on the ASA score

Table 3 VLAD Knee Replacement Readmission Indicator Definition

Outcome (Numerator)	
Outcome	<p>Knee Replacement patients readmitted to any Queensland hospital within a specified interval since discharge to home / usual residence for a condition that could be considered a consequence of the procedure. See Appendix B for relevant ICD codes and readmission intervals.</p> <p>Readmissions were identified using probabilistic matching to allow inclusion of readmissions to a different facility as well as readmissions to the same facility. Episodes were matched using patient name (first name, surname and phonetic version of surname), date of birth, address (street, suburb and postcode), age and sex. I370	I37.0 - Pulmonary valve stenosis	7
I371	I37.1 - Pulmonary valve insufficiency	7
I372	I37.2 - Pulmonary valve stenosis with insufficiency	7
I378	I37.8 - Other pulmonary valve disorders	7
I379	I37.9 - Pulmonary valve disorder, unspecified	7
I38	I38 - Endocarditis, valve unspecified	30
I400	I40.0 - Infective myocarditis	30
I401	I40.1 - Isolated myocarditis	30
I408	I40.8 - Other acute myocarditis	30
I409	I40.9 - Acute myocarditis, unspecified	30
I420	I42.0 - Dilated cardiomyopathy	7
I440	I44.0 - Atrioventricular block, first degree	30
I441	I44.1 - Atrioventricular block, second degree	30
I442	I44.2 - Atrioventricular block, complete	30
I443	I44.3 - Other and unspecified atrioventricular block	30
I444	I44.4 - Left anterior fascicular block	30
I445	I44.5 - Left posterior fascicular block	30
I446	I44.6 - Other and unspecified fascicular block	30
I447	I44.7 - Left bundle-branch block, unspecified	30
I450	I45.0 - Right fascicular block	30
I451	I45.1 - Other and unspecified right bundle-branch block	30
I452	I45.2 - Bifascicular block	30
I453	I45.3 - Trifascicular block	30
I454	I45.4 - Nonspecific intraventricular block	30
I455	I45.5 - Other specified heart block	30
I458	I45.8 - Other specified conduction disorders	30
I459	I45.9 - Conduction disorder, unspecified	30
I460	I46.0 - Cardiac arrest with successful resuscitation	30
I461	I46.1 - Sudden cardiac death, so described	30
I469	I46.9 - Cardiac arrest, unspecified	30
I470	I47.0 - Re-entry ventricular arrhythmia	30
I471	I47.1 - Supraventricular tachycardia	30
I472	I47.2 - Ventricular tachycardia	30
I479	I47.9 - Paroxysmal tachycardia, unspecified	30
I48	I48 - Atrial fibrillation and flutter	30
I490	I49.0 - Ventricular fibrillation and flutter	30
I491	I49.1 - Atrial premature depolarisation	30
I492	I49.2 - Junctional premature depolarisation	30
I493	I49.3 - Ventricular premature depolarisation	30
I494	I49.4 - Other and unspecified premature depolarisation	30
I495	I49.5 - Sick sinus syndrome	30
I498	I49.8 - Other specified cardiac arrhythmias	30

ICD codes	Icd codes and descriptions for AMI readmission	Interval (days)
I499	I49.9 - Cardiac arrhythmia, unspecified	30
I500	I50.0 - Congestive heart failure	30
I501	I50.1 - Left ventricular failure	30
I509	I50.9 - Heart failure, unspecified	30
I510	I51.0 - Cardiac septal defect, acquired	30
I511	I51.1 - Rupture of chordae tendineae, not elsewhere classified	30
I512	I51.2 - Rupture of papillary muscle, not elsewhere classified	30
I513	I51.3 - Intracardiac thrombosis, not elsewhere classified	30
I515	I51.5 - Myocardial degeneration	30
I516	I51.6 - Cardiovascular disease, unspecified	30
I517	I51.7 - Cardiomegaly	30
I518	I51.8 - Other ill-defined heart diseases	30
I519	I51.9 - Heart disease, unspecified	30
I600	I60.0 - Subarachnoid haemorrhage from carotid siphon and bifurcation	30
I601	I60.1 - Subarachnoid haemorrhage from middle cerebral artery	30
I602	I60.2 - Subarachnoid haemorrhage from anterior communicating artery	30
I603	I60.3 - Subarachnoid haemorrhage from posterior communicating artery	30
I604	I60.4 - Subarachnoid haemorrhage from basilar artery	30
I605	I60.5 - Subarachnoid haemorrhage from vertebral artery	30
I606	I60.6 - Subarachnoid haemorrhage from other intracranial arteries	30
I607	I60.7 - Subarachnoid haemorrhage from intracranial artery, unspecified	30
I608	I60.8 - Other subarachnoid haemorrhage	30
I609	I60.9 - Subarachnoid haemorrhage, unspecified	30
I610	I61.0 - Intracerebral haemorrhage in hemisphere, subcortical	7
I611	I61.1 - Intracerebral haemorrhage in hemisphere, cortical	7
I612	I61.2 - Intracerebral haemorrhage in hemisphere, unspecified	7
I613	I61.3 - Intracerebral haemorrhage in brain stem	7
I614	I61.4 - Intracerebral haemorrhage in cerebellum	7
I615	I61.5 - Intracerebral haemorrhage, intraventricular	7
I616	I61.6 - Intracerebral haemorrhage, multiple localised	7
I618	I61.8 - Other intracerebral haemorrhage	7
I619	I61.9 - Intracerebral haemorrhage, unspecified	7
I620	I62.0 - Subdural haemorrhage (acute)(nontraumatic)	30
I621	I62.1 - Nontraumatic extradural haemorrhage	30
I629	I62.9 - Intracranial haemorrhage (nontraumatic), unspecified	30
I630	I63.0 - Cerebral infarction due to thrombosis of precerebral arteries	7
I631	I63.1 - Cerebral infarction due to embolism of precerebral arteries	7
I632	I63.2 - Cerebral infarction due to unspecified occlusion or stenosis of precerebral arteries	7
I633	I63.3 - Cerebral infarction due to thrombosis of cerebral arteries	7
I634	I63.4 - Cerebral infarction due to embolism of cerebral arteries	7
I635	I63.5 - Cerebral infarction due to unspecified occlusion or stenosis of cerebral arteries	7
I636	I63.6 - Cerebral infarction due to cerebral venous thrombosis, nonpyogenic	7
I638	I63.8 - Other cerebral infarction	7
I639	I63.9 - Cerebral infarction, unspecified	7
I64	I64 - Stroke, not specified as haemorrhage or infarction	7
I650	I65.0 - Occlusion and stenosis of vertebral artery	7
I651	I65.1 - Occlusion and stenosis of basilar artery	7
I652	I65.2 - Occlusion and stenosis of carotid artery	7
I653	I65.3 - Occlusion and stenosis of multiple and bilateral precerebral arteries	7
I658	I65.8 - Occlusion and stenosis of other precerebral artery	7

ICD codes	ICD codes and descriptions for AMI readmission	Interval (days)
I659	I65.9 - Occlusion and stenosis of unspecified precerebral artery	7
I660	I66.0 - Occlusion and stenosis of middle cerebral artery	7
I661	I66.1 - Occlusion and stenosis of anterior cerebral artery	7
I662	I66.2 - Occlusion and stenosis of posterior cerebral artery	7
I663	I66.3 - Occlusion and stenosis of cerebellar arteries	7
I664	I66.4 - Occlusion and stenosis of multiple and bilateral cerebral arteries	7
I668	I66.8 - Occlusion and stenosis of other cerebral artery	7
I669	I66.9 - Occlusion and stenosis of unspecified cerebral artery	7
I674	I67.4 - Hypertensive encephalopathy	7
I690	I69.0 - Sequelae of subarachnoid haemorrhage	7
I691	I69.1 - Sequelae of intracerebral haemorrhage	7
I692	I69.2 - Sequelae of other nontraumatic intracranial haemorrhage	7
I693	I69.3 - Sequelae of cerebral infarction	7
I694	I69.4 - Sequelae of stroke, not specified as haemorrhage or infarction	7
I698	I69.8 - Sequelae of other and unspecified cerebrovascular diseases	7
I740	I74.0 - Embolism and thrombosis of abdominal aorta	7
I741	I74.1 - Embolism and thrombosis of other and unspecified parts of aorta	7
I742	I74.2 - Embolism and thrombosis of arteries of upper extremities	7
I743	I74.3 - Embolism and thrombosis of arteries of lower extremities	7
I744	I74.4 - Embolism and thrombosis of arteries of extremities, unspecified	7
I745	I74.5 - Embolism and thrombosis of iliac artery	7
I748	I74.8 - Embolism and thrombosis of other arteries	7
I749	I74.9 - Embolism and thrombosis of unspecified artery	7
I800	I80.0 - Phlebitis and thrombophlebitis of superficial vessels of lower extremities	7
I801	I80.1 - Phlebitis and thrombophlebitis of femoral vein	7
I802	I80.2 - Phlebitis and thrombophlebitis of other deep vessels of lower extremities	30
I803	I80.3 - Phlebitis and thrombophlebitis of lower extremities, unspecified	7
I808	I80.8 - Phlebitis and thrombophlebitis of other sites	7
I809	I80.9 - Phlebitis and thrombophlebitis of unspecified site	7
I822	I82.2 - Embolism and thrombosis of vena cava	7
I823	I82.3 - Embolism and thrombosis of renal vein	7
I828	I82.8 - Embolism and thrombosis of other specified veins	7
I829	I82.9 - Embolism and thrombosis of unspecified vein	7
I950	I95.0 - Idiopathic hypotension	30
I951	I95.1 - Orthostatic hypotension	30
I952	I95.2 - Hypotension due to drugs	30
I958	I95.8 - Other hypotension	30
I959	I95.9 - Hypotension, unspecified	30
I970	I97.0 - Postcardiotomy syndrome	30
I971	I97.1 - Other functional disturbances following cardiac surgery	30
I978	I97.8 - Other postprocedural disorders of circulatory system, not elsewhere classified	30
I979	I97.9 - Postprocedural disorder of circulatory system, unspecified	30
J13	J13 - Pneumonia due to Streptococcus pneumoniae	7
J14	J14 - Pneumonia due to Haemophilus influenzae	7
J150	J15.0 - Pneumonia due to Klebsiella pneumoniae	7
J151	J15.1 - Pneumonia due to Pseudomonas	7
J152	J15.2 - Pneumonia due to staphylococcus	7
J153	J15.3 - Pneumonia due to streptococcus, group B	7
J154	J15.4 - Pneumonia due to other streptococci	7
J155	J15.5 - Pneumonia due to Escherichia coli	7
J156	J15.6 - Pneumonia due to other aerobic Gram-negative bacteria	7

ICD codes	Icd codes and descriptions for AMI readmission	Interval (days)
J157	J15.7 - Pneumonia due to Mycoplasma pneumoniae	7
J158	J15.8 - Other bacterial pneumonia	7
J159	J15.9 - Bacterial pneumonia, unspecified	7
J160	J16.0 - Chlamydial pneumonia	7
J168	J16.8 - Pneumonia due to other specified infectious organisms	7
J180	J18.0 - Bronchopneumonia, unspecified	7
J181	J18.1 - Lobar pneumonia, unspecified	7
J182	J18.2 - Hypostatic pneumonia, unspecified	7
J188	J18.8 - Other pneumonia, organism unspecified	7
J189	J18.9 - Pneumonia, unspecified	7
J200	J20.0 - Acute bronchitis due to Mycoplasma pneumoniae	7
J201	J20.1 - Acute bronchitis due to Haemophilus influenzae	7
J202	J20.2 - Acute bronchitis due to streptococcus	7
J22	J22 - Unspecified acute lower respiratory infection	7
J440	J44.0 - Chronic obstructive pulmonary disease with acute lower respiratory infection	7
J441	J44.1 - Chronic obstructive pulmonary disease with acute exacerbation, unspecified	7
J690	J69.0 - Pneumonitis due to food and vomit	7
J691	J69.1 - Pneumonitis due to oils and essences	7
J698	J69.8 - Pneumonitis due to other solids and liquids	7
J81	J81 - Pulmonary oedema	30
J90	J90 - Pleural effusion, not elsewhere classified	7
J91	J91 - Pleural effusion in conditions classified elsewhere	7
J942	J94.2 - Haemothorax	7
J96	J96 - Respiratory failure, not elsewhere classified	7
J960	J96.0 - Acute respiratory failure	7
J961	J96.1 - Chronic respiratory failure	7
J969	J96.9 - Respiratory failure, unspecified	7
J981	J98.1 - Pulmonary collapse	7
K250	K25.0 - Gastric ulcer, acute with haemorrhage	30
K251	K25.1 - Gastric ulcer, acute with perforation	7
K252	K25.2 - Gastric ulcer, acute with both haemorrhage and perforation	7
K253	K25.3 - Gastric ulcer, acute without haemorrhage or perforation	7
K254	K25.4 - Gastric ulcer, chronic or unspecified with haemorrhage	30
K255	K25.5 - Gastric ulcer, chronic or unspecified with perforation	30
K256	K25.6 - Gastric ulcer, chronic or unspecified with both haemorrhage and perforation	7
K257	K25.7 - Gastric ulcer, chronic without haemorrhage or perforation	7
K259	K25.9 - Gastric ulcer, unspecified as acute or chronic, without haemorrhage or perforation	7
K260	K26.0 - Duodenal ulcer, acute with haemorrhage	30
K261	K26.1 - Duodenal ulcer, acute with perforation	7
K262	K26.2 - Duodenal ulcer, acute with both haemorrhage and perforation	30
K263	K26.3 - Duodenal ulcer, acute without haemorrhage or perforation	7
K264	K26.4 - Duodenal ulcer, chronic or unspecified with haemorrhage	30
K265	K26.5 - Duodenal ulcer, chronic or unspecified with perforation	7
K266	K26.6 - Duodenal ulcer, chronic or unspecified with both haemorrhage and perforation	30
K267	K26.7 - Duodenal ulcer, chronic without haemorrhage or perforation	7
K269	K26.9 - Duodenal ulcer, unspecified as acute or chronic, without haemorrhage or perforation	7
K270	K27.0 - Peptic ulcer, acute with haemorrhage	30
K271	K27.1 - Peptic ulcer, acute with perforation	7
K272	K27.2 - Peptic ulcer, acute with both haemorrhage and perforation	30

ICD codes	Icd codes and descriptions for AMI readmission	Interval (days)
K273	K27.3 - Peptic ulcer, acute without haemorrhage or perforation	7
K274	K27.4 - Peptic ulcer, chronic or unspecified with haemorrhage	30
K275	K27.5 - Peptic ulcer, chronic or unspecified with perforation	7
K276	K27.6 - Peptic ulcer, chronic or unspecified with both haemorrhage and perforation	30

R11	R11 - Nausea and vomiting	7
R18	R18 - Ascites	7
R31	R31 - Unspecified haematuria	7
R33	R33 - Retention of urine	7
R410	R41.0 - Disorientation, unspecified	7
R42	R42 - Dizziness and giddiness	7
R509	R50.9 - Fever, unspecified	7
R55	R55 - Syncope and collapse	7
R570	R57.0 - Cardiogenic shock	7
R571	R57.1 - Hypovolaemic shock	7
R579	R57.9 - Shock, unspecified	7
R58	R58 - Haemorrhage, not elsewhere classified	7
S061	S06.1 - Traumatic cerebral oedema	7
S0630	S06.30 - Focal cerebral and cerebellar injury, unspecified	7
S0631	S06.31 - Focal cerebral contusion	7
S0632	S06.32 - Focal cerebellar contusion	7
S0633	S06.33 - Focal cerebral haematoma	30
S0634	S06.34 - Focal cerebellar haematoma	30
S0638	S06.38 - Other focal cerebral and cerebellar injury	7
S064	S06.4 - Epidural haemorrhage	30
S065	S06.5 - Traumatic subdural haemorrhage	7
S066	S06.6 - Traumatic subarachnoid haemorrhage	7
S068	S06.8 - Other intracranial injuries	7
S7200	S72.00 - Fracture of neck of femur, part unspecified	7
S7201	S72.01 - Fracture of intracapsular section of femur	7
S7202	S72.02 - Fracture of upper epiphysis (separation) of femur	7
S7203	S72.03 - Fracture of subcapital section of femur	7
S7204	S72.04 - Fracture of midcervical section of femur	7
S7205	S72.05 - Fracture of base of neck of femur	7

ICD codes	Icd codes and descriptions for AMI readmission	Interval (days)
S7208	S72.08 - Fracture of other parts of neck of femur	7
T444	T44.4 - Predominantly alpha-adrenoreceptor agonists, not elsewhere classified	30
T446	T44.6 - Alpha-Adrenoreceptor antagonists, not elsewhere classified	30
T447	T44.7 - Beta-Adrenoreceptor antagonists, not elsewhere classified	30
T455	T45.5 - Anticoagulants	30
T460	T46.0 - Cardiac-stimulant glycosides and drugs of similar action	7
T461	T46.1 - Calcium-channel blockers	7
T462	T46.2 - Other antidysrhythmic drugs, not elsewhere classified	7
T463	T46.3 - Coronary vasodilators, not elsewhere classified	7
T464	T46.4 - Angiotensin-converting-enzyme inhibitors	7
T465	T46.5 - Other antihypertensive drugs, not elsewhere classified	7
T466	T46.6 - Antihyperlipidaemic and antiarteriosclerotic drugs	7
T467	T46.7 - Peripheral vasodilators	7
T469	T46.9 - Other and unspecified agents primarily affecting the cardiovascular system	7
T500	T50.0 - Mineralocorticoids and their antagonists	7
T501	T50.1 - Loop [high-ceiling] diuretics	7
T502	T50.2 - Carbonic-anhydrase inhibitors, benzothiadiazides and other diuretics	7
T503	T50.3 - Electrolytic, caloric and water-balance agents	7
T800	T80.0 - Air embolism following infusion, transfusion and therapeutic injection	7
T801	T80.1 - Vascular complications following infusion, transfusion and therapeutic injection	7
T802	T80.2 - Infections following infusion, transfusion and therapeutic injection	7
T810	T81.0 - Haemorrhage and haematoma complicating a procedure, not elsewhere classified	7
T812	T81.2 - Accidental puncture and laceration during a procedure, not elsewhere classified	7
T813	T81.3 - Disruption of operation wound, not elsewhere classified	7
T814	T81.4 - Infection following a procedure, not elsewhere classified	7
T815	T81.5 - Foreign body accidentally left in body cavity or operation wound following a procedure	7
T816	T81.6 - Acute reaction to foreign substance accidentally left during a procedure	7
T817	T81.7 - Vascular complications following a procedure, not elsewhere classified	7
T818	T81.8 - Other complications of procedures, not elsewhere classified	7
T819	T81.9 - Unspecified complication of procedure	7
T820	T82.0 - Mechanical complication of heart valve prosthesis	7
T821	T82.1 - Mechanical complication of cardiac electronic device	7
T822	T82.2 - Mechanical complication of coronary artery bypass and valve grafts	7
T823	T82.3 - Mechanical complication of other vascular grafts	7
T825	T82.5 - Mechanical complication of other cardiac and vascular devices and implants	7
T826	T82.6 - Infection and inflammatory reaction due to cardiac valve prosthesis	7
T827	T82.7 - Infection and inflammatory reaction due to other cardiac and vascular devices, implants and grafts	7
T828	T82.8 - Other complications of cardiac and vascular prosthetic devices, implants and grafts	7
T829	T82.9 - Unspecified complication of cardiac and vascular prosthetic device, implant and graft	7
T830	T83.0 - Mechanical complication of urinary (indwelling) catheter	7
T835	T83.5 - Infection and inflammatory reaction due to prosthetic device,	7

	implant and graft in urinary system	
T887	T88.7 - Unspecified adverse effect of drug or medicament	7
T888	T88.8 - Other specified complications of surgical and medical care, not elsewhere classified	7
T889	T88.9 - Complication of surgical and medical care, unspecified	7
Z450	Z45.0 - Adjustment and management of cardiac device	7

RTI Release

Appendix B – Readmission Principal Diagnoses for Knee and Hip Replacement Readmissions

Principal Diagnoses that are included in only Hip Replacement or Knee Replacement are highlighted.

ICD 10-AM codes for Knee and Hip Replacement readmissions	Interval (0 - n days)	Hip	Knee
A04.7 Enterocolitis due to Clostridium difficile	30	Y	Y
A40 Streptococcal sepsis	7	Y	Y
A41 Other sepsis	7	Y	Y
A49 Bacterial infection of unspecified site	7	Y	Y
D50.0 Iron deficiency anaemia secondary to blood loss (chronic)	15	Y	Y
D50.8 Other iron deficiency anaemias	15	Y	Y
D50.9 Iron deficiency anaemia, unspecified	15	Y	Y
D62 Acute posthaemorrhagic anaemia	7	Y	Y
D64.9 Anaemia, unspecified	7	Y	Y
D68.3 Haemorrhagic disorder due to circulating anticoagulants	7	Y	Y
D68.4 Acquired coagulation factor deficiency	7	Y	Y
D68.5 Primary thrombophilia	7	Y	Y
D68.6 Other thrombophilia	7	Y	Y
D68.8 Other specified coagulation defects	7	Y	Y
